MEMORANDUM

DATE: February 22, 2012
TO: Ashley Davis
FROM: Leo Simone
SUBJECT: Melrose Triangle Existing Tree Inventory

This memorandum is in reference to the Existing Tree Survey conducted on the Melrose Triangle Project in West Hollywood in 2011 by Rios Clementi Hale Studios. A total of 61 ornamental trees consisting of nine species were identified within or immediately adjacent to the proposed project site. Based on the referenced Existing Tree Survey, the ten affected tree species and disposition are as follows:

- Chinese Elm (*Ulmus parvifolia*) 28 total of which 25 will be retained and 3 removed
- Water gum (*Tristaniaopsis laurina*) 5 total all to be retained
- Jacaranda (*Jacaranda mimosifolia*) 5 total of which 4 will be retained and 1 removed
- Mexican fan palm (*Washingtonia robusta*) 7 total all to be removed
- Peppermint tree (*Agonis flexuosa*) 1 tree to be removed
- Floss silk tree (*Chorisia speciosa*) 1 tree to be removed
- Indian laurel fig (*Ficus microcarpa*) 9 total all to be removed
- King palm (*Archontophoenix cunninghamiana*) 3 total all to be removed
- Canary Island date palm (*Phoenix Canariensis*) 2 total to remain

All of the trees identified within the study are non-native ornamental species and their removal is not considered significant.

Melrose Triangle Tree Survey June 2, 2004

Scientific Name	Common Name	Trunk Diameter at Breast Height (Inches)	Estimated Overall Height (Feet)	Status
<i>Phoenix canariensis</i>	Canary Island Palm	40	55	Remain
<i>Jacaranda acutifolia</i>	Jacaranda	3	15	Remain
<i>Jacaranda acutifolia</i>	Jacaranda	15	40	Remain
<i>Jacaranda acutifolia</i>	Jacaranda	15	40	Remain
