

WEST HOLLYWOOD PARK PHASE II - ADDITIONAL CORRESPONDENCE

As of 5/29/14

Date Submitted	Park Component	Comment
6/11/2014	Locker rooms	The locker/shower/restroom issue needs to be looked at based on comments from the June 4th Design Steering Committee.
6/11/2014	Water feature	Do not introduce a water feature anywhere in the design - they are ALWAYS problematic and really don't say GREEN in a water starved southern California.
6/11/2014	Park Area	Keep the park for passive activities; the results of the master plan and outreach overwhelmingly revealed that residents want OPEN space to relax and gather as a respite from the density of the urban environment. If necessary, accommodate a minimum amount of infrastructure to accommodate activity if it's fairly unobtrusive.
