

STORMWATER PLANNING PROGRAM LID PLAN CHECKLIST

Project Name	Owner Name	Developer Name
Project Address	Owner Address	Developer Address
Owner Phone	Owner Fax	Developer Phone

Does the proposed project fall into one of the following categories? Please check Yes/No	YES	NO
PRIORITY LID* PROJECTS		
1. Construction* of a new restaurant (SIC 5812) with 5,000 square feet or more of surface area	<input type="checkbox"/>	<input type="checkbox"/>
2. Construction* of a new industrial park with 10,000 square feet or more of surface area	<input type="checkbox"/>	<input type="checkbox"/>
3. Construction* of a new commercial mall with 10,000 square feet or more surface area	<input type="checkbox"/>	<input type="checkbox"/>
4. Construction* of a new retail gasoline outlet with 5,000 square feet or more of surface area	<input type="checkbox"/>	<input type="checkbox"/>
5. Construction* of a new parking lot with either 5,000 ft ² or more of impervious* surface or with 25 or more parking spaces	<input type="checkbox"/>	<input type="checkbox"/>
6. Construction* of a new automotive service facility (SIC 5013, 5014, 5511, 5541, 7532-7534 and 7536-7539) with 5,000 square feet or more of surface area	<input type="checkbox"/>	<input type="checkbox"/>
7. Construction* of a new project equal to 1 acre or greater of disturbed area and adding more than 10,000 square feet of impervious* surface area	<input type="checkbox"/>	<input type="checkbox"/>
8. Projects located in or directly adjacent to, or discharging directly to a Significant Ecological Area (SEA), where the development will: a. Discharge stormwater runoff that is likely to impact a sensitive biological species or habitat; and b. Create 2,500 square feet or more of impervious surface area	<input type="checkbox"/>	<input type="checkbox"/>
9. Redevelopment* of 5,000 square feet or more in one of the categories listed above	<input type="checkbox"/>	<input type="checkbox"/>
10. Redevelopment* of 10,000 square feet or more to a Single Family Home, without a change in landuse.	<input type="checkbox"/>	<input type="checkbox"/>

If any of the boxes 1-10 are checked YES, this project will require the preparation of a Low Impact Development (LID)* Plan with a Maintenance Agreement*

A LID Plan containing special provisions is required for all private & public projects that 1) do not qualify as a Priority LID Project and 2) satisfy any of the following:

SPECIAL PROVISION LID PROJECTS		
11. Small site LID with 500 square feet or more of soil disturbance*	text-align: center;"> <input type="checkbox"/>	text-align: center;"> <input type="checkbox"/>
12. Green street* project with 10,000 square feet or more of impervious surface area	<input type="checkbox"/>	<input type="checkbox"/>
13. Single family hillside* home	<input type="checkbox"/>	<input type="checkbox"/>

If any of the boxes 11-13 are checked YES, this project will require the preparation of a plan with special provisions associated with the type of development

* Defined on back

DEFINITIONS:

LID: Low Impact Development (LID) is a stormwater management strategy that emphasizes conservation and the use of existing natural site features integrated with distributed, small-scale stormwater controls to more closely mimic natural hydrologic patterns in residential, commercial, and industrial settings.

Construction: Construction includes any construction or demolition activity, clearing, grading, grubbing, or excavation or any other activity that results in land disturbance.

Impervious: Surfaces that do not allow stormwater runoff to percolate into the ground. Typical impervious surfaces include: concrete, asphalt, roofing materials, etc. However, some specially designed concrete/asphalt allow water to percolate (i.e. pervious pavers).

Redevelopment: Land-disturbing activities that result in the creation, addition, or replacement of impervious surface area on an already developed site.

Redevelopment does not include routine maintenance activities that are conducted to maintain the original line and grade, hydraulic capacity, or original purpose of facility, nor does it include modifications to existing single family structures, or emergency construction activities required to immediately protect public health and safety.

Maintenance Agreement: All developments subject to LID requirements must provide verification of maintenance for Structural and Treatment Control BMPs. Verification at a minimum shall include:

- Recorded maintenance covenant; and
- The developer's and/or owner's signed statement accepting responsibility for maintenance until the responsibility is legally transferred; and
- A signed statement from the owner assuming responsibility for Structural or Treatment Control BMP maintenance and conduct a maintenance inspection at least once a year.

BMP: Best Management Practices (BMPs) are practices or physical devices or systems designed to prevent or reduce pollutant loading from stormwater or non-stormwater discharges to receiving waters, or designed to reduce the volume of stormwater or non-stormwater discharged to the receiving water.

Small Site LID: A residential, commercial or industrial development that does not fall into any of the above categories and will result in a soil disturbance equal to or greater than 500 square feet. These projects required to develop a Small Site LID Plan which follows the City of West Hollywood's *Small Site LID Manual*. See Form PC-2.

Green Streets: Any street and road construction of 10,000 square feet or more of impervious surface area. Street and road construction applies to standalone streets, roads, highways, and freeway projects, and also applies to streets within larger projects. These sites are required to develop a Green Streets Plan with the following provisions:

- a. Follow an approved green streets manual to the maximum extent practicable. Stormwater mitigation measures must be in compliance with the approved green streets manual requirements.

Hillside: A property where the slope is 25% or greater and where grading contemplates cut or fill slopes. Single family hillside homes will require a less extensive plan. These sites are required to develop a Hillside Protection Plan showing the following measures are to be implemented:

- a. Conserve natural areas
- b. Protect slopes and channels
- c. Provide storm drain system stenciling and signage
- d. Divert/direct runoff to vegetated areas before discharge unless the diversion would result in slope instability
