## 1.0 EXECUTIVE SUMMARY

An Environmental Site Assessment - Phase I was prepared for the subject property located at 7811 Santa Monica Blvd & 1114 Orange Grove Ave West Hollywood, CA 90046. The scope of work for the Phase I meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments*. The purpose of the Phase I report is to provide information regarding the potential for hazardous material impacts to the soil and groundwater beneath the subject property. Such threats or material threats are identified in this report as recognized environmental conditions (RECs). The extent of this evaluation in conjunction with owner/client supplied data is intended to satisfy the requirements of all appropriate inquiry into the previous ownership and uses of the property. The scope of the work included a site reconnaissance, research of land use records and other sources for preliminary indications of hazardous material use, storage, or disposal at the property and/or on contiguous parcels.

Historical site utilization research indicates that the subject property was initially developed with a cleaning and dyeing facility from 1919-1970 (Hollywood City Dye Works, Kings Hollywood Cleaners). In 1950, there were approximately six structures onsite including store/office spaces and a neon sign manufacturing facility with a spray painting booth attached (National Neon Products). In 1955 a soap manufacturing facility was present onsite. Until at least 1970 the subject property remained developed with the neon sign manufacturing facility, cleaning/dyeing facility, and soap manufacturing facility. National Neon Production vacated the subject property in 1989/90. From 1990 to present the subject property was utilized as commercial office space and parking areas. There is currently one single-story structure onsite that is utilized as a gym/workout space.

No evidence of current or historical use, storage, generation and/or disposal of hazardous substances was observed onsite. The subject property is identified on the EMI and EDR US Historical Cleaners databases. There are no underground storage tank files or industrial records maintained at the Los Angeles County Department of Public Works Environmental Programs Division for the subject property.

The nearest listed contaminated site to the subject property is the LA County Fire Department station #8 located approximately 1,000 feet to the east. The station is a former leaky tank site that received case closure in October 2003. It is considered unlikely the subject property was impacted by this offsite cross-gradient source.

A data failure was encountered in the preparation of this report. The Part B Owner and Part C User questionnaires were not returned. This data gap does not alter the conclusions/recommendations of this report. Review of a preliminary title report revealed no evidence of environmental liens or environmental activity use limitation (AULs) associated with the subject property. **This assessment has revealed evidence of recognized environmental conditions (RECs) in connection with the subject property.** The former presence of a neon sign (solvents/metals) manufacturing facility, clothes cleaning/pressing (solvents) facility and a cleaning/dyeing (solvents) facility are considered RECs in connection with the subject property. These facilities historically utilized solvents. Mercury use is also a potential issue in connection with the neon sign manufacturing facility. It is recommended that these RECs be evaluated through subsurface assessment consisting of soil and soil gas sampling and analysis. An asbestos/lead survey is recommended prior to the demolition/redevelopment of the subject property building.

## 2.0 INTRODUCTION

The following report presents the findings of the Environmental Site Assessment - Phase I prepared for the subject property located at 7811 Santa Monica Blvd & 1114 N. Orange Grove West Hollywood, California 90046. The scope of the Phase I study meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments* and included research of available land use records and other sources for preliminary indications of hazardous material use, storage or disposal at the property. The findings of this study are intended to provide information to the client regarding potential hazardous material impacts to the soil and groundwater beneath the site.

The scope of the investigation was conducted in general accordance with ASTM Standard Practice for Environmental Site Assessments – Phase I, Environmental Site Assessment Process ASTM E 1527-13. The steps outlined in this process are intended to permit a user (client) to satisfy one of the requirements to qualify for the innocent land owner, contiguous property owner, or bona fide purchaser limitations on CERCLA liability. Specifically, this report along with certain obligations of the client, constitutes All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with the standard of care as practiced in this area by environmental professionals. A main component of the assessment is to identify recognized environmental conditions as they may affect the subject property. As defined by ASTM E 1527-13, a recognized environmental condition (REC) means “*the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property.*”

An important component of complying with the ASTM E 1527-13 Standard is information to be obtained or in the possession of the client and/or seller of the property. Such information includes obtaining and review of a recent title report, any specialized information regarding the site or surrounding area which may give rise to identification of a recognized environmental condition, and/or reasons given by the seller should the purchase price be significantly lower than what would be reasonably expected for a property of similar size and value. Often a real estate appraiser is

commissioned to evaluate the purchase or sale price of a property. Such an appraisal is outside the scope of this Phase I Assessment report.

The independent conclusions represent California Environmental's (CE) professional judgment based on the conditions that existed and the information and data available during the course of study. Factual information regarding operations, conditions, and test data provided by the client, the owner or their representatives have been assumed to be correct and complete. This report includes **GENERAL FINDINGS** and **CONCLUSIONS AND RECOMMENDATIONS**, which together with the remainder of this report are subject to the **NOTICE** at the end of the report. **This report was prepared for the sole use and reliance by the client as identified on the title page of this report. Use of this report by other entities is expressly forbidden unless permission is granted by the client and CE.**

The scope of work included:

- A walkover of the site.
- Review of client/owner supplied information including a title report.
- Review of building and grading permits on file with the City of West Hollywood Building Department.
- Review of underground storage tank files and industrial waste records maintained by the Los Angeles County Department of Public Works Environmental Programs Division.
- Review of historical USGS topographic maps and historical aerial photographs maintained by EDR Company.
- Research of historical Sanborn Fire Insurance Maps maintained by EDR Company.
- Contact with the California Environmental Protection Agency, Department of Toxic Substances Control to review their files.
- Contact with the California Environmental Protection Agency, Regional Water Quality Control Board to review their files.
- Contact with the Los Angeles County Health Department to review their files.

- Contact with the South Coast Air Quality Management District to review their files.
- Review of the DOGGR Well Finder Online Mapping Program, Oil Field Maps, and oil well records maintained by the State of California Division of Oil, Gas, and Geothermal Resources.
- Review of the City of Los Angeles - City Wide Methane Ordinance Map (A-20960).
- Review of Los Angeles County Landfill Maps.
- Review of the following lists and maps of suspect or known contaminated sites; a complete listing of these sources is contained within **APPENDIX IV**.
  - California Regional Water Quality Control Board, (RWQCB) - *Computer Case Listing of Reported Underground Tank Leaks*, covering Los Angeles County.
  - California Department of Health Services - *Hazardous Waste and Substance Sites - Cortese List and Contaminated Wells List*, which includes the Bond Expenditure Plan (BEP) sites.
  - California Environmental Protection Agency, Facility and Manifest Data, HAZNET.
  - Historical California Environmental Protection Agency, Department of Toxic Substances Control - *CalSites List*.
  - California Department of Health Services, *Hazardous Waste Information System* (HWIS) and Tanner Report.
  - California Integrated Waste Management Board, *Solid Waste Information System* - (SWIS) List.
  - State Water Resources Control Board, *Toxic Pits Clean-up Act (Toxic Pits)*.
  - State Water Resources Control Board, *Hazardous Substance Storage Container Database* (UST, LUST, SLIC, and WDS).
  - U.S. Environmental Protection Agency - *National Priorities List* (NPL).
  - U.S. Environmental Protection Agency - *Comprehensive Environmental Response, Compensation, and Liability Information System* (CERCLIS).
  - U.S. Environmental Protection Agency, *Toxic Release Inventory System* (TRIS).

- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information, System Treatment, Storage and Disposal Facilities*, (RCRA-TSDF).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Large Quantity Generators*, (RCRA-LQG).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Small Quantity Generators*, (RCRA-SQG).
- U.S. Environmental Protection Agency - *Superfund Amendment and Reauthorization Act, Title III*, (SARA Title III).
- U.S. Environmental Protection Agency, *Emergency Response Notification System* (ERNS).
- U.S. Environmental Protection Agency, *Facility Index System* (FINDS).
- U.S. Environmental Protection Agency, *Civil Enforcement Docket* (DOCKET).
- A review of government records databases of suspect or known contaminated sites and historical city directories research was performed by EDR Company. The results of the search are summarized in this report. The EDR reports are enclosed in **APPENDICES II and IV**.
- Preparation of this report.

## 3.0 SITE DESCRIPTION

### 3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located between Ogden Drive and Orange Grove Avenue on the north side of Santa Monica Blvd, in the City of West Hollywood, California; see **FIGURE 1 - VICINITY MAP**. The current street addresses for the property are 7811 Santa Monica Blvd and 1114 Orange Grove Ave. According to the Los Angeles County Tax Assessor's office, the Assessor's Parcel Numbers (APNs) for the subject property are 5530-002-067 and -019.

### 3.2 SITE RECONNAISSANCE

The site conditions were observed during a reconnaissance conducted by Mr. Samuel Buckley of California Environmental and Mr. Darren Embry on March 10, 2014. California Environmental completed an Environmental Field Reconnaissance Checklist during the site reconnaissance. An Environmental Field Interview and User Questionnaires were provided to the User. The Field/User Questionnaire was not returned. The Environmental Field Reconnaissance Checklist is included in **APPENDIX I**. The features described below are shown on the enclosed **FIGURE 2 - PLOT PLAN**. Photographs of the subject property are attached in the **ILLUSTRATIONS** section of this report.

#### 3.2.1 Description of Property/Proposed Project

The subject property consists of one rectangular parcel and one irregular L-shaped parcel of land that encompass approximately 0.75 acres. The property is currently developed with one single-story gym structure. The interior is largely unfinished, consisting of large open workout spaces. The building is currently occupied by Brick Crossfit training gym. The remainder of the property is asphalt paved parking area for the gym. The Orange Grove parcel is a city-operated parking lot. Access to the property is via Santa Monica Blvd to the south and Orange Grove Ave to the west.

### **3.2.2 Adjacent Properties**

The subject property is bordered to the north by a pre-school with residential development beyond; to the east by Executive Car Leasing (car rental agency); to the south by Santa Monica Blvd with commercial properties beyond including more car leasing offices; and to the west by Euro Design AutoCrafts, Inc, a body/collision auto repair shop and automobile painting facility.

### **3.2.3 Topography and Drainage**

The subject property has a gentle slope to the south. The topographic elevation of the subject property is approximately 290 feet amsl. Drainage from the site is by sheetflow towards the adjacent city streets. No evidence of surface drains, catch basins, sumps or standing water was observed on the subject property at the time of the site reconnaissance.

### **3.2.4 Past Uses of the Property**

No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property at the time of the site reconnaissance.

### **3.2.5 Use of Hazardous Substances**

No evidence of hazardous substance use was observed on the subject property at the time of the site reconnaissance.

### **3.2.6 Storage Tanks**

No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property at the time of the site reconnaissance.

### **3.2.7 Containers of Hazardous or Unidentified Substances**

Several cans of household paint were observed in the parking lot of the subject property. No significant evidence of containers of hazardous or unidentified substances was observed on the subject property at the time of the site reconnaissance.

### **3.2.8 Solid Waste Disposal**

One trash bin was observed. No evidence of spills and/or staining was observed on the pavement beneath the bin. Several large tires presumed to be utilized as workout equipment were observed in the parking area. No other evidence of onsite disposal or landfill of solid waste material was observed on the subject property at the time of the site reconnaissance.

### **3.2.9 Poly-Chlorinated Biphenyl's (PCBs)**

No evidence of PCB containing transformers or equipment was observed on the subject property at the time of the site reconnaissance. Fluorescent light fixtures were observed in the subject building. Fluorescent light fixtures manufactured prior to 1977 (and fluorescent light fixtures without a date of manufacture) may have ballasts capacitors that contain PCBs, which is recognized by the EPA as a suspect carcinogen. Used fluorescent lamp tubes are considered to be hazardous mercury-bearing waste requiring proper disposal in accordance with local, state, and federal requirements. The onsite ballasts were not inspected during the site reconnaissance. Due to the date of construction of the subject building, it is considered likely that the onsite ballasts contain PCB concentrations greater than the federal action limit of 50 parts per million (ppm). It is recommended that the fluorescent light fixtures be inspected for PCB content labels prior to disposal.

### **3.2.10 Heating/Cooling Equipment**

Heating and cooling equipment was not observed at the time of the site reconnaissance.

### **3.2.11 Asbestos Containing Building Materials (ACM)**

Sampling of suspect asbestos containing material (ACM) was not included in the scope of work for this study. Due to the age of construction of the subject building it is recommended that an asbestos survey be conducted by a certified asbestos consultant prior to renovation or demolition of the subject building.

### **3.2.12 Wastewater Disposal Systems**

Wastewater treatment or disposal systems were not observed on the subject property at the time of the site reconnaissance. No evidence of wastewater treatment or disposal systems was observed on the subject property at the time of the site reconnaissance. It is not uncommon for early development properties to have onsite sewerage disposal systems such as seepage pits and/or cesspools.

### **3.2.13 Radon**

Radon hazard assessment was not included in the scope of this study. However, the EDR research report indicates the levels of radon at 68 sites located within the 90046 zip code in Los Angeles County were below four picoCurie per Liter (pCi/L), the Federal Action level.

### **3.2.14 Lead**

Sampling of suspect lead in paint was not included in the scope of work for this project. Lead content in paint was significantly reduced in 1977. Due to the date of construction of the subject building, it is possible that lead based paint was utilized onsite. The paint coating of the structures were in good condition at the time of the site reconnaissance.

### **3.2.15 Wells**

No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property at the time of the site reconnaissance.

### **3.2.16 Odor**

No evidence of strong, pungent or noxious odors was noted on the subject property at the time of the site reconnaissance.

### **3.2.17 Stressed Vegetation**

No evidence of stressed vegetation was observed on the subject property at the time of the site reconnaissance.

### **3.2.18 Staining or Residue**

No evidence of staining or residue was observed on the subject property at the time of the site reconnaissance.

### **3.2.19 Pits, Ponds, or Lagoons**

No evidence of pits, ponds, and/or lagoons was observed on the subject property at the time of the site reconnaissance.

### **3.2.20 Potable Water Supply**

The City of Los Angeles Department of Water and Power supply water to the subject property.

### **3.2.21 Sewage Disposal System**

The subject property is connected to the public sewage disposal system.

### **3.2.22 Other Conditions of Concern**

No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property at the time of the site reconnaissance.

### **3.3 SITE DRIVE-BY**

A drive-by of the area within one-quarter mile of the property was conducted to help identify nearby sites that possibly use, store or generate hazardous materials. The area surrounding the subject property consists of residential and commercial properties. An automobile painting and repair shop is located adjacent to the subject property. No service stations are located on the properties adjacent to the subject property. A list of selected environmental risk sites identified within a one-quarter mile radius of the subject property is included in the **STANDARD ENVIRONMENTAL RECORDS SOURCES** section of this report.

## **4.0 PREVIOUS WORK**

No previous environmental reports were provided for the subject property.

## **5.0 GEOLOGY AND HYDROGEOLOGY**

The subject property is located near the southern margin of the Transverse Ranges Geomorphic Province where the Santa Monica Mountains abut the Los Angeles Coastal Plain. The property is underlain by recent and older alluvial fan deposits shed from the adjacent Santa Monica Mountains. The site is within the Hollywood Groundwater Basin. A prominent structural feature in the area is the Santa Monica/Hollywood (SMHF) Fault which is the bounding fault (located approximately one mile to the north) along the southern edge of the Santa Monica Mountains. The alluvial deposits are underlain by Pliocene through Miocene sedimentary rocks.

The subject property is located within the central portion of the Hollywood Groundwater Basin. The site is underlain by sandy silts and clays of the Bellflower aquiclude which extends to a depth of approximately 85 feet below ground surface in the vicinity of the site. Groundwater occurs in the Exposition aquifer, which extends from the bottom of the Bellflower aquiclude to depths of approximately 145 feet below ground surface. Perched or semi-perched groundwater may occur within the aquiclude. The regional direction of groundwater flow is towards the south.

A nearby impacted site is the World Oil #65 site located approximately 1,750 feet to the west of the subject property (8020 Santa Monica Blvd). The site had a release of gasoline that was evaluated and remediated under the oversight of the LARWQCB. The site received case closure in 2005. As part of their evaluation and monitoring, groundwater monitoring wells were installed on the property in 2001. Depth to groundwater in the monitoring wells was found to be between 62-76 feet bgs. The groundwater flow direction was south-southwest.

The Los Angeles County Department of Public Works Hydrological Records Division maintains well information for the County of Los Angeles. The nearest well to the subject property is well no. 2642P located approximately 0.75 miles south of the property near the intersection of Genesee Ave and Rosewood Ave. The latest measurement was taken on 10/21/2009, and showed the groundwater elevation to be 12.2 feet bgs.

## 6.0 SITE UTILIZATION HISTORY

### 6.1 HISTORICAL CITY DIRECTORIES

EDR Company was contacted to research historical city directories for the subject property and adjacent sites. The city directories were reviewed at approximately five year intervals spanning from 1920-2004. A summary of city directories reviewed for the subject property is included in **TABLE I**. The EDR City Directory is attached in **APPENDIX II**.

**TABLE I**

## **6.2 BUILDING PERMIT RESEARCH**

The City of West Hollywood Department of Building and Safety was visited by our personnel for the purpose of researching building permits and Certificates of Occupancies for the property. The file for the 1114 Orange Grove parcel contained a building permit application from 1993 for a mixed-use condominium and retail structure. It also contained a demolition permit from 2004 for a commercial building. The file for the 7811 Santa Monica Blvd property contained permits for commercial improvements from 1989, the permit for the construction of a medical office in 2010, and a tenant improvement permit from 2013 to convert the building from office space to a fitness studio.

## **6.3 UNDERGROUND STORAGE TANK PERMIT RESEARCH**

The Los Angeles County Department of Public Works Environmental Programs Division was contacted to obtain files containing underground storage tank (UST) records and industrial waste files for the subject property. A response letter indicates that no files are maintained for the subject property. The inquiry and response letters are attached in **APPENDIX III**.

## **6.4 STATE REGULATORY AGENCY FILE REVIEW**

Inquiry letters were sent to the State of California Department of Toxic Substances Control (DTSC) and the California Regional Water Quality Control Board – Los Angeles Region (RWQCB). Response letters from RWQCB and DTSC indicates that there were no records maintained for the subject property address. The agency inquiries and response letters are included in **APPENDIX III**.

CalEPA DTSC and RWQCB online databases were also reviewed. The DTSC Envirostor lists Federal Superfund, State Response, Voluntary Clean-ups, School Clean-ups and Investigations, Military Evaluations and Geotracker LUFT/SLIC databases. The subject property is not listed on the databases researched for this report. There are six listed facilities identified within a 2,000-foot radius of the subject property. A review of nearby environmental concern sites can be found in the **STANDARD ENVIRONMENTAL RECORDS** section of this report.

## **6.5 LACHD AND SCAQMD FILE REVIEW**

An inquiry letter was sent to the Los Angeles County Health Department (LACHD) for any information they may have regarding soil, water or air contamination at the subject property. A file was reviewed for the subject property. The file outlined the business practices conducted at the subject property associated with the formerly present National Neon Production facility. Part of their production process included sheet metal work and spray paint booths. The sheet metal produced no hazardous waste. The spray painting produced paint thinner and waste paint that was stored in containers and hauled by an authorized transporter while the sludge was disposed of via trash service.

A review of the SCAQMD Facility Information Detail (FIND) database indicates that no records are maintained for the subject property addresses. The agency inquiry and response letters are included in **APPENDIX III**.

## 6.6 HISTORICAL AERIAL PHOTOGRAPH RESEARCH

Historical aerial photographs were reviewed as part of this study. The photographs are part of the aerial photograph collections maintained by the EDR Company. Ten photographs were reviewed for the subject property. The photographs are summarized below in **TABLE II**. The aerial photographs are attached in **APPENDIX II** of this report.

**TABLE II**  
**Historical Aerial Photographs**

Date	Source	Description
1928	Fairchild	The subject property is developed with approximately five structures. The property is in an area of dense urban development. A gasoline/oil service station is present on the adjacent western parcel.
1938	Laval	The subject property appears to be in the same development configuration as the previous photo. The adjacent service station remains present. The surrounding area remains populated with primarily residential development except for the commercial structures along Santa Monica Blvd.
1947	Fairchild	The subject property and surrounding area appear similar to the previous photo.
1956	Fairchild	The subject property and surrounding area appear similar to the previous photo. The adjacent service station remains present.
1965	Fairchild	The subject property and surrounding area appear similar to the previous photo. The formerly adjacent service station is no longer present.
1976	Teledyne	The subject property remains developed with approximately five structures. A large shopping center is located on the other side of Orange Grove Ave from the subject property.
1989	USGS	The subject property and surrounding area appear similar to the previous photo.
1994	USGS	The subject property and surrounding area appear similar to the previous photo.
2002	USGS	The subject property appears developed with three structures. The surrounding area appears developed with commercial/residential structures.
2005	EDR	The subject property appears developed with one structure and the Orange Grove parcel is a parking lot (current configuration).

## 6.7 HISTORICAL FIRE INSURANCE MAPS

The EDR Company was contacted to review historical fire insurance maps for the subject property. Maps covering the subject property for nine time periods were found. The map descriptions are summarized below in **TABLE III**. Copies of the fire insurance maps are attached in the **ILLUSTRATIONS** section of this report.

**TABLE III**  
**Historical Fire Insurance Maps**

Date	Description
1919	The subject property is developed with four structures associated with a cleaning & dyeing facility. The surrounding area is mainly undeveloped.
1950	The subject property is developed with five/six structures. The SM Blvd parcel is occupied by a pressing and cleaning/dyeing facility. A store, offices, and a neon sign manufacturing facility with a spray-painting area occupy the Orange Grove parcel. The adjacent western parcel (corner of SM Blvd and Orange Grove) contains an auto repair and spray painting facility as well as a gasoline/oil service station. The areas north and south of Santa Monica Blvd are developed with residential structures.
1955	The subject property is developed with six structures. A soap manufacturing facility, offices, and a neon sign manufacturing facility with a spray-painting area occupy the Orange Grove parcel. A pressing facility and a cleaning/dyeing facility occupy the Santa Monica Blvd parcels. The adjacent western parcel remains developed with an auto repair and spray painting facility as well as a gasoline/oil service station.
1960	The soap manufacturing facility on the Orange Grove parcel is replaced with a detergent packaging facility. The remained of the property remains similar to the previous map. The adjacent gasoline/oil station remains present.
1961	The subject property appears similar to the previous map. The adjacent parcel no longer contains a gasoline/oil service station.
1962	The subject property and surrounding area appear similar to the previous map.
1966	The subject property and surrounding area appear similar to the previous map.
1969	The subject property and surrounding area appear similar to the previous map.
1970	The subject property and surrounding area appear similar to the previous map.

## 6.8 HISTORICAL TOPOGRAPHIC MAP RESEARCH

Historical USGS topographic maps were provided by EDR Company and from online database sources. Maps covering the subject property for eight time periods were found. The map descriptions are summarized below in **TABLE IV**. The topographic maps are attached in **APPENDIX II** of this report.

**TABLE IV**  
**Historical Topographic Maps**

Date	Quadrangle	Description
1900	Los Angeles	The subject property is located to the west of the City of Hollywood at the base of the Santa Monica Mountains. The Cahuenga Pass is located to the northeast of the subject property.
1901	Santa Monica	The subject property is located northwest of the city of Los Angeles. Santa Monica can be seen to the southwest of the subject property on the coast of the Pacific Ocean. Limited development appears in the subject property vicinity. Pasadena is located to the east of the subject property.
1902	Hollywood	The subject property and surrounding area appear similar to the 1900 map.
1926	Hollywood	The subject property appears in an area of dense development on the north side of Santa Monica Blvd. The La Brea oil fields are located to the south of the subject property. The topographic elevation of the subject property is approximately 290 ft. amsl.
1966	Hollywood	The subject property appears in an area of urban development. The La Brea oil field has been replaced by urban development.
1972	Hollywood	The subject property and surrounding area appear similar to previous map.
1981	Hollywood	The subject property and surrounding area appear similar to previous map.
1994	Hollywood	The subject property and surrounding area appear similar to previous map.

## 7.0 NEARBY CONTAMINATED SITES

### 7.1 LANDFILLS

The Major Waste System maps for Los Angeles County, the Solid Waste Information Systems (SWIS), and the Waste Management Unit Database (WMUD) were reviewed to identify landfills and transfer stations located near the property.

Map no. 144-157 and the EDR database report indicate that there are no landfills or transfer stations located within a 2,000-foot radius of the subject property. No active hazardous waste landfills are located within Los Angeles County.

## **7.2 OIL FIELD MAPS/METHANE HAZARD ZONES**

Oil field maps published by the State of California Division of Oil, Gas and Geothermal Resources (DOGGR) and online mapping systems (DOGGR Well Finder) were researched to determine if oil production occurred on or near the subject property. Wildcat map no. 1-5 indicates that there are no oil wells or oil field located within a 2,000-foot radius of the property. The site is not located within a recognized Methane Hazard Zone.

## **7.3 STANDARD ENVIRONMENTAL RECORD SOURCES**

In addition to the above records, agency database lists were reviewed for known or suspected contaminated sites and for sites which store, generate or use hazardous materials near the subject property. The property is listed on the EMI and EDR US Hist Cleaners databases. Fifty-eight environmental sites, listed on the EDR Us Hist Auto Station, EDR US Hist Cleaners, EMI, DRYCLEANERS, HIST CORTESE, SWEEPS UST, HIST UST, CA FID UST, UST, LUST, and RCRA-SQG databases, are located within a one-quarter mile radius of the subject property. The nearest listed contaminated site to the subject property is the LA County Fire Department station #8 located approximately 1,000 feet to the east. The station is a former leaky tank site that received case closure in October 2003. It is considered unlikely that the soil or groundwater beneath the subject site are impacted by the release identified on the government environmental databases. Selected environmental risk sites found to exist within a 1,500 ft. radius of the property are listed in **TABLE V**. The EDR Radius Map with GeoCheck is attached in **APPENDIX IV**.

**TABLE V**  
**Standard Environmental Record Sources**

Name	Address	Distance from Subject Property	Source(s)
Natl Neo Prod.	1114 N Orange Grove Ave	<b>Subject Property</b>	EMI

Laurel Pet Hospital	7970 Santa Monica Blvd	1,230 ft. W	RCRA-SQG, FINDS

Note: A search of public information databases may omit some nearby contaminated sites due to missing or inaccurate information in the public record. Listings from the EDR US Hist Auto Station/Cleaners databases over 500 ft. from the subject property were not included in this table.

#### **7.4 POTENTIAL VAPOR ENCROACHMENT CONDITION (p-VEC)**

The State of California has adopted Indoor Air Quality Guidelines (CHHSL's) issued by CALEPA in 2005. Potential sources for indoor air contamination include degassing of solvents and other compounds from contaminated soil and contaminated groundwater. A neon sign manufacturing facility was present at the subject property from 1958-1990, a cleaning/dyeing facility was present from 1919-1970, and a clothes cleaning/pressing facility was also present from 1929-1958. The past use of solvents associated with these facilities on the subject property suggests the potential of a vapor encroachment condition. It is recommended to evaluate this p-VEC through subsurface assessment consisting of soil gas testing.

## 8.0 GENERAL FINDINGS

During the research phase of this study, the following information was obtained:

- Historical topographic map research indicates the subject property was in an area of dense development beginning in 1926.
- The elevation of the subject property ranges is approximately 290 feet above mean sea level.
- Topographic contour lines in the vicinity of the subject and adjacent properties indicate a gentle slope toward the south.
- Sanborn Fire Insurance Map research indicates the subject property was initially developed with a cleaning and dyeing facility in 1919.
- Historical aerial photograph research indicates that the subject property was developed with five structures in 1928.
- Building permit records showed the oldest permit on file to be a commercial renovation permit for office spaces in 1989.
- Historical city directories indicate that a variety of commercial/light industrial tenants have occupied the subject property space including National Neon Products (sign manufacturing) Crescent Machine Works, Hollywood City Dye Works, and Kings Hollywood Cleaners.
- No underground storage tank records or industrial waste files are maintained at the Los Angeles County Department of Public Works Environmental Programs Division.
- No records are maintained at DTSC for the subject property.
- No records are maintained at RWQCB for the subject property.
- No records are maintained at SCAQMD for the subject property.

- A file was reviewed at LACHD for the subject property. The file outlined the business practices conducted at the subject property associated with the formerly present National Neon Production facility. Part of their production process included sheet metal work and spray paint booths. The sheet metal produced no hazardous waste. The spray painting produced paint thinner and waste paint that was stored in containers and hauled by an authorized transporter while the sludge was disposed of via trash service.
- No landfills or transfer stations are located within a 2,000-foot radius of the subject property.
- No oil wells or oil fields are located within a 2,000-foot radius of the subject property.
- The subject property is not located within a recognized methane hazard zone.
- The subject property is identified on the EMI and EDR US Historical Cleaners databases.
- The nearest listed contaminated site to the subject property is the LA County Fire Department station #8 located approximately 1,000 feet to the east. The station is a former leaky tank site that received case closure in October 2003. It is considered unlikely the subject property has been impacted by this offsite cross-gradient source.
- The depth to groundwater beneath the subject property is estimated at 50-75 ft bgs.
- A potential vapor encroachment condition (p-VEC) was found associated with the subject property.
- The regional direction of groundwater flow is towards the south.

During the site reconnaissance, the following observations were made:

- The subject property consists of one irregular shaped parcel and one rectangular parcel that encompass approximately 0.75 acres.
- The property is currently developed with one single-story office/gym structure. The Orange Grove Ave parcel is developed with a city-operated parking lot.

- The subject property is nearly level. Drainage from the site is by sheetflow towards the adjacent city streets.
- No evidence of surface drains, catch basins, sumps or standing water was observed on the subject property.
- No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property.
- No evidence of hazardous substance use was observed on the subject property.
- No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property.
- No evidence of large containers of hazardous or unidentified substances was observed on the subject property.
- No evidence of onsite disposal or landfill of solid waste material was observed on the subject property.
- No evidence of PCB containing transformers or equipment was observed on the subject property.
- Heating and cooling equipment was not observed at the time of the site reconnaissance.
- No evidence of wastewater treatment or disposal systems was observed on the subject property.
- No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property.
- No evidence of strong, pungent or noxious odors was noted on the subject property.
- No evidence of stressed vegetation was observed on the subject property.
- No evidence of staining or residue was observed on the subject property.

- No evidence of pits, ponds, and/or lagoons was observed on the subject property.
- The subject property is connected to the public sewage disposal system.
- No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property.
- The area surrounding the subject property consists of commercial properties.

## 9.0 CONCLUSIONS AND RECOMMENDATIONS

Historical site utilization research indicates that the subject property was initially developed with a cleaning and dyeing facility from 1919-1970 (Hollywood City Dye Works, Kings Hollywood Cleaners). In 1950, there were approximately six structures onsite including store/office spaces and a neon sign manufacturing facility with a spray painting booth attached (National Neon Products). In 1955 a soap manufacturing facility was also present. Up to 1970 the subject property remained developed with the neon sign manufacturing facility, cleaning/dyeing facility, and soap manufacturing facility. National Neon Production vacated the subject property in 1989/90. From 1990 to present the subject property has been utilized as commercial office space and parking areas. There is currently one structure onsite that is utilized as a gym/workout space.

No evidence of use, storage, disposal or generation of hazardous substances was observed onsite. The subject property is identified on the EMI and EDR US Historical Dry Cleaners databases. There are no underground storage tank files or industrial records maintained at the Los Angeles County Department of Public Works Environmental Programs Division.

The nearest listed contaminated site to the subject property is the LA County Fire Department station #8 located approximately 1,000 feet to the east. The station is a former leaky tank site that received case closure in October 2003. It is considered unlikely the subject property has been impacted by this offsite cross-gradient source.

A data failure was encountered in the preparation of this report. The Part B Owner and Part C User questionnaires were not returned. Review of a preliminary title report revealed no evidence of environmental liens or environmental activity use limitation (AULs) associated with the subject property.

California Environmental has prepared an Environmental Site Assessment - Phase I in conformance with the scope and limitations of ASTM 1527-13 for the property located at 7811 Santa Monica Blvd & 1114 Orange Grove Ave West Hollywood, California 90046. **This assessment has revealed evidence of recognized environmental conditions in connection with the subject property.** The former presence of a neon sign manufacturing facility, clothes cleaning/pressing facility and a cleaning/dyeing

facility are considered RECs in connection with the subject property. These facilities historically utilized solvents. Mercury use is also a potential issue in connection with the neon sign manufacturing facility. It is recommended that these RECs be evaluated through subsurface assessment consisting of soil and soil gas sampling and analysis.

### **Potential Vapor Encroachment Condition (p-VEC)**

A recognized environmental condition was identified in connection with the property. A neon sign manufacturing facility was present at the subject property from 1958-1990, a cleaning/dyeing facility was present from 1919-1970, and a clothes cleaning/pressing facility was also present from 1929-1958. The State of California has adopted Indoor Air Quality Guidelines issued by CalEPA in 2005. One of the potential sources for indoor air contamination is degassing of solvents and other compounds from underlying contaminated soil/groundwater. Therefore, subsurface assessment activities are recommended for the subject property to determine if the subsurface has been impacted by the historical onsite use of solvents.

This report is subject to the following **NOTICE**:

## 10.0 NOTICE

All properties are subject to some element of environmental risk and the risk cannot be eliminated. Industrial and commercial properties developed prior to modern environmental laws are especially risk prone to environmental hazards which include, but are not limited to, wastes which may be toxic, ignitable, corrosive or reactive. The potential for these environmental hazards to impact the use of the property can be reduced by the identification and mitigation of the hazards prior to development or redevelopment of the property. Due to the difficulty in locating underground wastes, in some cases it is not always possible to ascertain that hazardous wastes are present on the property prior to development.

A Phase I environmental site assessment does not utilize subsurface exploration to check for the presence of hazardous wastes on the property. The experience of the assessor, along with the research of available reports, aerial photographs and land use records are used to evaluate the potential for hazardous wastes to occur on the site. Based on the information gained from the historical research, subsurface exploration may be recommended to check for the presence of hazardous wastes. Preexisting environmental problems such as the presence of hazardous wastes in the soil or groundwater, can be concealed by grading activities and site improvements. If such wastes are present these wastes cannot be observed.

The undersigned, Charles I. Buckley declares that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312 and I have the specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20.

This report was prepared with the skill and competence as commonly used by environmental professionals in this area. No warranty, expressed or implied, of any kind is made or intended in connection with this report, or by the fact you are being furnished this report, or by any other oral or written statement.

Should you have any questions or desire any additional information, please contact the undersigned.

Respectfully Submitted,

Charles I. Buckley

### **EDUCATION:**

- ◆ **Masters** Work in Hydrogeology  
California State University, Los Angeles, 1980-1988
- ◆ **Bachelor of Science**, Geology (Engineering Geology)  
University of California, Los Angeles, 1978

### **REGISTRATIONS AND APPOINTMENTS:**

- ◆ State of California, Dept. of Conservation, Former Member, State Mining and Geology Board (Appointed by Gov. Pete Wilson and State Senate confirmed to 4 year term, 1997-2001)
- ◆ State of California, Certified Hydrogeologist, No. 55
- ◆ State of California, Registered Geologist No. 4035
- ◆ State of California, Certified Engineering Geologist No. 1250

### **PROFESSIONAL EXPERIENCE:**

Jan 88-Present      CALIFORNIA ENVIRONMENTAL  
                          CEO - Principal Hydrogeologist

Founded California Environmental in January of 1988. Clients include Fortune 500 Corporations, County Government, Municipal Agencies, Financial Institutions, Land Developers, and Consultants. Principal Investigator for groundwater supply and groundwater contamination investigations. Project leader for groundwater remediation at a State of California Superfund Sites. Principal hydrogeologist for design and implementation of a groundwater monitoring network for an existing Sanitary Landfill. Lead investigator to delineate structure of a California Groundwater Basin; Pioneered use of a cost effective soil/gas vapor technique used to track groundwater plumes. Conducted over 2000 Phase I Environmental Investigations in California. These investigations included the use and interpretation of historic topographic maps, Sanborn Insurance Maps, aerial photography, and other historic data sources. Successfully completed remedial clean-up on 500+ sites in southern California; including impacts associated with fuels, PCBs, metals, asbestos and chlorinated solvents. Expert consultant for environmental impairment of soil and groundwater: Expert for the Port of Los Angeles, L.A. County Counsel, L.A. City Recreation and Parks and private attorneys.

## **PROFESSIONAL EXPERIENCE:** (continued)

Mar 84-Dec 87    KOVACS-BYER AND ASSOCIATES  
                            **Manager Environmental Services Group**

Spearheaded the development into the groundwater and environmental segments of consulting market. Ascended from project geologist status to manager of Environmental Services Group. Responsible for all aspects of project management including; organization and staffing, developing technical requirements needed to complete projects, client and agency liaison.

Provided technical leadership for groundwater testing including design and analysis of aquifer pump tests. Lead Geotechnical Investigator for remedial repair of complex landslide terrains. Prepared Seismic Analysis for critical facilities. Recommended specialized drainage systems for abatement of groundwater problems. Project Consultant for award winning projects on which severe geotechnical problems were overcome.

Mar 80-Mar 84    GEOTECHNICAL SERVICES GROUP; BUREAU OF ENGINEERING;  
                            CITY OF LOS ANGELES  
                            **Assistant Engineering Geologist**

Performed geologic mapping in hillside areas of the City of Los Angeles. Reviewed Geotechnical Reports submitted to the City of Los Angeles for private development. Directed landslide investigations. Prepared Expert Opinion documents regarding groundwater and geologic issues for the City Engineer and City Attorney. Conducted field monitoring of known landslides within the City of Los Angeles.

Aug 79-Mar 80    UNITED STATES GEOLOGICAL SURVEY  
                            **Field Assistant**

Assisted in geological mapping for a uranium resource development project sponsored by the Department of Energy and the United States Geological Survey.

**APPENDIX I**

**Environmental Field Reconnaissance Checklist and  
Field Interview and User Questionnaires**

**ENVIRONMENTAL FIELD  
RECONNAISSANCE CHECKLIST (PART A)**

Completed By: Samuel T. Buckley Title: Project Manager  
 Property Address: 7811 SM Blvd & 1114 Orange Grove Ave Date: 3/10/14

<b>USES OF THE PROPERTY</b>	
1. Name of present occupants of the property (include business names and addresses or unit numbers):	Brick Crossfit
2. Describe the present use(s) of the property:	Gym, parking lot
3. Describe the present of adjacent properties:	North – pre-school, residential East – car sales/leasing/rentals South – SM Blvd, commercial beyond West – auto repair/painting
4. Is the property used for an industrial use?	No
5. Is any adjoining property used for an industrial use?	Yes – adjacent auto repair/painting
6. Is the property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	No
7. Is the property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
8. Is any adjoining property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	Yes – auto repair to the west on SM Blvd
9. Is any adjoining property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
10. Is the property used for agricultural purposes?	No
<b>PROPERTY CONDITIONS</b>	
11. Are there or have there been any damaged or discarded industrial or automotive batteries on the property?	None observed
12. Are there currently any solvents, paints, fuels, pesticides, herbicides, or other chemicals, in individual containers larger than 5 gallons or totaling more than 50 gallons, used on or stored at the property?	Yes-household paints observed in parking lot of gym
13. Are there currently any industrial drums (typically 55 gallons) or sacks of chemicals located on the property?	No
14. Is there any visible evidence fill dirt has been brought onto the property from a contaminated site?	No
15. Is there any visible evidence fill dirt has been brought onto the property from an unknown site?	No
16. Are there any waste treatment or waste disposal ponds, pits or lagoons on the property?	No
17. Is there any stained soil, or soil emitting unusual odors, on the property?	No

18. Are there any flooring, drains, or walls in the facility that are stained by substances other than water or have emitted unusual odors?	No
19. Is there heating and cooling equipment onsite?	Rooftop HVAC units
20. What is the fuel source for any onsite heating and cooling equipment?	Natural gas/electricity
21. Is there any visible evidence of storage tanks (underground or aboveground) at the property?	No
22. Are there currently or have there been any vent pipes, fill pipes, fill ports, or surface covers indicating possible fill ports on the property or adjacent to any building located on the property?	No
23. Is there visible evidence of geotechnical and/or environmental subsurface assessments such as patched borings or groundwater monitoring well covers?	No
24. Are there any oil wells, drilling sums, mud pits, or oil pipelines on or adjacent to the property?	No
25. Are there any pipelines on, beneath, or adjacent to the property, other than water, sewer, and natural gas utilities serving the property?	No
26. Is the property known to be located in a methane hazard area due to oil fields, natural seepage, or landfill gas?	No
27. Does the property or any facility at the property produce wastewater other than domestic sewage and storm water runoff?	No
28. Are there any waste water treatment systems (clarifiers, oil/water separators, grease traps, filtration systems, etc.) at the property?	No
29. How is waste water from the property disposed of? Sanitary sewer. Septic system. Surface water. Pond, pit, sump, or well. Other (describe).	Sanitary sewer
30. Does the property or any facility at the property produce solid waste other than domestic trash and greenwaste?	No
31. How is solid waste from the property disposed of? Municipal or private trash service. Recycling. Onsite dumping or burial. Other (describe).	Municipal trash
32. How is solid waste stored at the property?	Bins
33. Does the property or any facility at the property generate hazardous or special waste in the course of normal operation? Examples include spent solvents, photo processing waste, waste oil, used filters, etc. Provide copies of generator notification or waste manifests.	No
34. If hazardous or special wastes are generated at the property, how are they stored?	n/a

## **EXECUTIVE SUMMARY**

### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### **RESEARCH SUMMARY**

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. The Sanborn Library has been searched by EDR and maps covering the target property location as provided by California Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

VARIOUS SITES  
PR #30307141

Dear Mr. Buckley:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced below.

- 7811 Santa Monica Boulevard, West Hollywood, CA 90046
  - 1114 Orange Grove Avenue, West Hollywood, CA 90046

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

Mr. Charles Buckley

**RE: 7811 SANTA MONICA BLVD., W. HOLLYWOOD, CA 90046**

I, the undersigned, being the Custodian or the Keeper of Records, certify that a thorough search for the records you requested was carried out under my direction and control.

**This search revealed no records.**

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or under another classification. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

If you have any questions regarding your request, please contact our office at (323) 890-7801.

Sincerely,

A handwritten signature in black ink, appearing to read "Yvonne Curtis".

**Yvonne Curtis, Deputy Health Officer  
Public Health Investigation**

## Department of Toxic Substances Control

Deborah O. Raphael, Director  
9211 Oakdale Avenue  
Chatsworth, California 91311

Edmund G. Brown Jr.  
Governor

March 27, 2014

Mr. Charles Buckley  
California Environmental  
30423 Canwood Street, Suite 208  
Agoura Hills, CA 91301

7819 Santa Monica Boulevard, West Hollywood, CA 90046  
PR #30320144

Dear Mr. Buckley:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site/facility referenced above.

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Chatsworth's Central Files, please contact me at (818) 717-6521.

Sincerely,

  
Vivien Tutaan/cs  
Regional Records Coordinator

## Environmental

Los Angeles County Department of Public Works  
Environmental Programs Division  
900 South Fremont Avenue  
Alhambra, California 91803-1331

California Environmental is performing an environmental site assessment for the following addresses:

7811 Santa Monica Blvd. and 1114 Orange Grove Ave West Hollywood, CA 90046      No Files Found

We are requesting a record search for any files you may have on underground storage tanks for those addresses. If no file is found, please provide a written statement to [sbuckley@earthlink.net](mailto:sbuckley@earthlink.net) or via fax 818-991-1544.

We greatly appreciated your assistance.

Should you have any questions regarding this file search, please feel free to contact the undersigned.

Thank you.

A handwritten signature in black ink, appearing to read "Charles Buckley".

Charles Buckley  
Principal

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which

## EXECUTIVE SUMMARY

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/06/2013 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

**EDR MGP:** The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

**EDR US Hist Auto Stat:** EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 23 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 19 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:	F003
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste code:	F005
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CA WDS:

Facility ID: Los Angeles River 197200021  
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: Not reported  
Subregion: 4  
Facility Telephone: Not reported  
Facility Contact: John Hundley  
Agency Name: WORLD OIL MARKETING CO.  
Agency Address: 9302 S. Garfield Avenue  
Agency City,St,Zip: South Gate 90280  
Agency Contact: John Hundley  
Agency Telephone: 5629280100  
Agency Type: Private  
SIC Code: 0  
SIC Code 2: Not reported  
Primary Waste Type: Not reported  
Primary Waste: Not reported  
Waste Type2: Not reported  
Waste2: Not reported  
Primary Waste Type: Not reported  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Note: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxic wastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)  
provides California with information on hazardous waste shipments for  
generators, transporters, and treatment, storage, and disposal  
facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Federal NPL site list*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/21/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

EPA Region 10 Telephone 206-553-8665	
---	--

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 01/09/2014

	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### **CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/09/2014
	Data Release Frequency: Quarterly

## **FEDERAL FACILITY: Federal Facility Site Information listing**

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 01/10/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 04/21/2014
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### **CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/09/2014
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

### **CORRACTS: Corrective Action Report**

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013

Last EDR Contact: 01/02/2014  
Next Scheduled EDR Contact: 04/14/2014  
Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013  
Date Data Arrived at EDR: 10/02/2013

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal institutional controls / engineering controls registries**

### **US ENG CONTROLS: Engineering Controls Sites List**

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 12/09/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

### **US INST CONTROL: Sites with Institutional Controls**

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 12/09/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

### **LUCIS: Land Use Control Information System**

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/20/2013	Source: Department of the Navy
Date Data Arrived at EDR: 11/21/2013	Telephone: 843-820-7326

Number of Days to Update: 95	Next Scheduled EDR Contact: 06/02/2014
	Data Release Frequency: Varies

## **Federal ERNS list**

### **ERNS: Emergency Response Notification System**

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 02/07/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 04/14/2014
	Data Release Frequency: Annually

## **State- and tribal - equivalent NPL**

### **RESPONSE: State Response Sites**

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/06/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/06/2013	Telephone: 916-323-3400
Date Made Active in Reports: 12/03/2013	Last EDR Contact: 02/06/2014
Number of Days to Update: 27	Next Scheduled EDR Contact: 05/19/2014
	Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/06/2013      Source: Department of Toxic Substances Control  
Date Data Arrived at EDR: 11/06/2013      Telephone: 916-323-3400

Number of Days to Update: 30      Next Scheduled EDR Contact: 01/02/2012  
Data Release Frequency: Quarterly

## LUST REG 1: Active Toxic Site Investigation

Del Norte, Humboldt, Lake, Mendocino, Modoc, Siskiyou, Sonoma, Trinity counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 02/01/2001      Source: California Regional Water Quality Control Board North Coast (1)  
Date Data Arrived at EDR: 02/28/2001      Telephone: 707-570-3769  
Date Made Active in Reports: 03/29/2001      Last EDR Contact: 08/01/2011  
Number of Days to Update: 29      Next Scheduled EDR Contact: 11/14/2011  
Data Release Frequency: No Update Planned

## LUST: Geotracker's Leaking Underground Fuel Tank Report

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 12/16/2013      Source: State Water Resources Control Board  
Date Data Arrived at EDR: 12/17/2013      Telephone: see region list

## ADDITIONAL ENVIRONMENTAL RECORDS

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/24/2013      Source: Environmental Protection Agency

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Local Lists of Hazardous waste / Contaminated Sites***

### **US CDL: Clandestine Drug Labs**

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013  
Date Data Arrived at EDR: 12/10/2013  
Date Made Active in Reports: 02/13/2014  
Number of Days to Update: 65

## US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 11/19/2008	Telephone: 202-307-1000
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 03/04/2014
Number of Days to Update: 131	Next Scheduled EDR Contact: 06/16/2014
	Data Release Frequency: No Update Planned

## *Local Lists of Registered Storage Tanks*

### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 09/05/1995	Telephone: 916-341-5851
Date Made Active in Reports: 09/29/1995	Last EDR Contact: 12/28/1998
Number of Days to Update: 24	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### UST MENDOCINO: Mendocino County UST Database

A listing of underground storage tank locations in Mendocino County.

Date of Government Version: 09/23/2009	Source: Department of Public Health
Date Data Arrived at EDR: 09/23/2009	Telephone: 707-463-4466
Date Made Active in Reports: 10/01/2009	Last EDR Contact: 03/03/2014
Number of Days to Update: 8	Next Scheduled EDR Contact: 06/16/2014
	Data Release Frequency: Annually

### HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/25/1991	Telephone: 916-341-5851
Date Made Active in Reports: 02/12/1991	Last EDR Contact: 07/26/2001
Number of Days to Update: 18	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005
Number of Days to Update: 35	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## *Local Land Records*

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## *Other Ascertainable Records*

### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENF: Enforcement Action Listing

A listing of Water Board Enforcement Actions. Formal is everything except Oral/Verbal Communication, Notice of Violation, Expedited Payment Letter, and Staff Enforcement Letter.

Date of Government Version: 08/09/2013      Source: State Water Resources Control Board  
Date Data Arrived at EDR: 08/13/2013      Telephone: 916-445-9379  
Date Made Active in Reports: 10/08/2013      Last EDR Contact: 02/10/2014  
Number of Days to Update: 56      Next Scheduled EDR Contact: 05/05/2014  
Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2012      Source: California Environmental Protection Agency

	Data Release Frequency: Varies

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 11/11/2011	Source: Environmental Protection Agency

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 06/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/13/2013	Telephone: 617-520-3000

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013

Last EDR Contact: 12/11/2013  
Next Scheduled EDR Contact: 03/31/2014  
Data Release Frequency: Annually

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.  
Telephone: (281) 769-2247  
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Licensed Facilities

Source: Department of Social Services  
Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

UTM X (Meters):	374561.6
UTM Y (Meters):	3772896.8
Elevation:	292 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	34118-A3 HOLLYWOOD, CA
Most Recent Revision:	1994
West Map:	34118-A4 BEVERLY HILLS, CA
Most Recent Revision:	1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

Target Property County  
LOS ANGELES, CA

FEMA Flood  
Electronic Data  
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

### **NATIONAL WETLAND INVENTORY**

NWI Quad at Target Property  
HOLLYWOOD

NWI Electronic  
Data Coverage  
YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles  
Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
Not Reported	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (decoded above as Era, System & Series)

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information								
	Boundary			Classification				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)	
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00	

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Surficial Soil Types: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Shallow Soil Types: fine sandy loam  
 gravelly - loam  
 sand  
 silty clay

Deeper Soil Types: stratified

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## **FARING CAPITAL**

8687 Melrose Avenue, Suite B538  
West Hollywood, CA 90069  
Attention: Mr. Jason Illoulian

Subject: Screening Soil Gas Evaluation, Commercial Properties, 7811 Santa Monica Blvd & 1114 N Orange Grove Ave West Hollywood, CA 90046.

Reference: Report by California Environmental (CE), ENVIRONMENTAL SITE ASSESSMENT - PHASE I, Commercial Properties, APNs 5530-002-067 and -019, 7811 Santa Monica Blvd & 1114 N Orange Grove, West Hollywood, CA 90046 dated June 2014.

Dear Mr. Illoulian:

### **Introduction**

CE is pleased to present the results of the screening soil gas assessment conducted for the subject property. This work was implemented following preparation of the above referenced Phase I Assessment Report (CE-ESA). The CE-ESA identified recognized environmental conditions (RECs) in connection with the property. The site is located between Ogden Drive and Orange Grove Avenue on the north side of Santa Monica Blvd, in the City of West Hollywood, California; see **FIGURE 1 – VICINITY MAP**.

Historical site utilization research indicates that the subject property was initially developed with a cleaning and dyeing facility from 1919-1970 (Hollywood City Dye Works, Kings Hollywood Cleaners). In 1950, there were approximately six structures onsite including store/office spaces and a neon sign manufacturing facility with a spray-painting booth attached (National Neon Products). In 1955 a soap manufacturing facility was present onsite. Until at least 1970 the subject property remained developed with the neon sign manufacturing facility, cleaning/dyeing facility, and soap manufacturing facility. National Neon Production vacated the subject property in 1989/90. From 1990 to present the subject property was utilized as commercial office space and parking areas. There is currently one single-story structure onsite that is utilized as a gym/workout space.

The former presence of the cleaning/dyeing facilities (possible solvent use) at the Santa Monica Blvd address and the neon sign manufacturing facility with spray booth at the Orange Grove are considered RECs. CE implemented soil gas testing and collected a soil sample on the property to evaluate these RECs.

## **Soil Gas Assessment**

Soil-gas sampling was implemented onsite on November 3, 2014. Southwest Geophysics located subsurface utilities at the exterior boring locations and the interior locations using total field magnetics and GPR methods. An Underground Service Alert notification was also made. H&P Mobile Geochemistry conducted soil-gas probe placement and sampling under the direction of California Environmental. A direct-push Strataprobe rig was utilized for the placement of the exterior soil vapor probes. The interior probes were hand-driven to depths of 5 ft. below ground surface (bgs). One soil gas probe was placed at 5 ft bgs in one location in the exterior parking area to the north of the gym structure. In the interior of the structure, four soil gas probes were placed at 5 ft bgs. The soil gas probe locations are shown on the attached **FIGURE 2 – ASSESSMENT MAP**. The interior probes were placed within the historical locations of the cleaning and dyeing facilities. Seven soil-gas samples were collected from the five locations including a sample duplicate. Soil-gas samples were obtained and analyzed for volatile organic compounds (USEPA Method 8260B) in general accordance with the DTSC/RWQCB guidelines (CalEPA/DTSC/RWQCB Soil-gas Advisory, 2012) in an onsite state certified mobile laboratory.

The soil-gas probes consisted of a sampling tip attached to inert nylon tubing. Each segment of tubing was pre-measured to ensure the correct depth. The sample point was set within a six inch sand-sensing zone at the desired depth of each soil vapor point. Dry granular bentonite was placed above and/or below the sand-sensing zone and hydrated in order to seal the sand-sensing zone. The probe was completed to the surface with the hydrated bentonite and capped with gas-tight 2-way valve preventing degassing of the gas point and interference from the surface. The soil-gas probes were allowed to equilibrate for two hours prior to the collection of the soil-gas samples. A standard 3-purge volume (3 PV) was utilized for the vapor sampling. 1,1-difluoroethane was utilized as the leak check compound. Vapor probe locations were sampled using the H&P Mobile Geochemistry SOP which includes protocols for surface seals, purge volume tests, tracer compounds, sample flow rate, duplicate samples, and analytical instrument calibration.

Laboratory analysis of soil-gas found concentrations of Ethylbenzene (4.2 ug/l – 4.3 ug/l) in two of the soil-gas samples (CE2 @ 5ft. and replicate). Detections of xylenes (1.3 ug/l - 24 ug/l) were detected in CE1 @ 5ft, CE2 @ 5ft, and the replicate sample. TCE was detected (0.44 ug/l – 2.2 ug/l) in CE3@5ft, CE4 @ 5ft, CE5 @ 5ft. and CE6 @ 5ft. The remaining samples were below the method-reporting limits for all other EPA Method 8260 compounds. One of the detections of TCE (CE4 @ 5ft. – 2.2 ug/l) exceeds the California Human Health Screening Level for commercial development. However, a risk calculation (see **Risk Evaluation** below) indicates that the incremental risk level for vapor intrusion to indoor air is less than the allowable of  $10^{-6}$  for commercial and residential properties. All other VOCs detected are at or below their respective CHHSLs for commercial development. The soil-gas laboratory report and chain of custody record are attached in **APPENDIX I**. The locations of the soil-gas probes are depicted on **FIGURE 2 – ASSESSMENT MAP**.

## **Soil Assessment**

A neon sign manufacturing facility was formerly located on the subject property in the area that is currently operating as a public parking lot (Orange Grove Ave). A soil sample was obtained and analyzed for heavy metals per Title 22 Metals. The detections found were consistent with regional

background concentrations of metals in soil. The complete soil sampling laboratory report is attached in **APPENDIX I.**

### **Risk Evaluation**

California Environmental implemented a screening soil gas assessment at the property during November 2014. The screening assessment was initiated to evaluate potential VOC impacts from the former onsite cleaning and dyeing facilities. The sampling identified low concentrations of tetrachloroethylene (TCE) in several of the soil gas samples obtained from the property. CalEPA-DTSC issued guidance documents for assessing risk associated with a variety of VOCs in shallow soil gas beneath residential/commercial properties in 2005, 2010 and 2012. A CalEPA-DTSC modified Johnson and Ettinger (J&E) model was used to assess the risk to human health from indoor air quality from the low concentration of TCE found in soil gas. The calculation showed the incremental risk level for vapor intrusion to indoor air to be less than the allowable of  $10^{-6}$  for commercial and residential properties. Therefore, future indoor air mitigation is not required.

### **Conclusions**

Soil gas testing beneath the subject site by CE revealed concentrations of TCE in four samples, ethylbenzene in two samples, and xylenes in three samples. The testing documents that a reportable release from the former onsite cleaning and dyeing facilities has not occurred. The majority of the onsite soil gas concentrations are at or below the CalEPA-DTSC advisory risk-based concentrations (CHHSLs) for VOCs in shallow soil gas for commercial properties. The risk analysis presented above indicates that the existing commercial building and future residential and/or commercial building(s) will not require vapor intrusion mitigation.

A soil sample was obtained and analyzed for heavy metals per Title 22 Metals. The concentrations of metals found are consistent with regional background concentrations of metals in soil. Further assessment is not recommended.

Should you have any questions or require additional information, please contact me directly.

Dear Mr. Charlie Buckley:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 03-Nov-14 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody

Unless otherwise noted, all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

A handwritten signature in black ink that reads "Janis Villarreal".

#### DETECTIONS SUMMARY

Sample ID: **CE1-5', P489cc**

Laboratory ID: **E411003-01**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>m,p-Xylene</b>	<b>1.3</b>	0.50	ug/l	H&P 8260 SV	

Sample ID: **CE2-5', P489cc**

Laboratory ID: **E411003-02**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>0.60</b>	0.10	ug/l	H&P 8260 SV	
<b>Ethylbenzene</b>	<b>4.3</b>	0.50	ug/l	H&P 8260 SV	
<b>m,p-Xylene</b>	<b>19</b>	0.50	ug/l	H&P 8260 SV	
<b>o-Xylene</b>	<b>5.0</b>	0.50	ug/l	H&P 8260 SV	

Sample ID: **CE2-5' REP, P539cc**

Laboratory ID: **E411003-03**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>0.54</b>	0.10	ug/l	H&P 8260 SV	
<b>Ethylbenzene</b>	<b>4.2</b>	0.50	ug/l	H&P 8260 SV	
<b>m,p-Xylene</b>	<b>19</b>	0.50	ug/l	H&P 8260 SV	
<b>o-Xylene</b>	<b>4.9</b>	0.50	ug/l	H&P 8260 SV	

Sample ID: **CE3-5', P137cc**

Laboratory ID: **E411003-04**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>0.76</b>	0.10	ug/l	H&P 8260 SV	

Sample ID: **CE4-5', P137cc**

Laboratory ID: **E411003-05**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>2.2</b>	0.10	ug/l	H&P 8260 SV	

Sample ID: **CE5-5', P137cc**

Laboratory ID: **E411003-06**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>1.7</b>	0.10	ug/l	H&P 8260 SV	

Sample ID: **CE6-5', P137cc**

Laboratory ID: **E411003-07**

Analyte	Reporting				Notes
	Result	Limit	Units	Method	
<b>Tetrachloroethene</b>	<b>0.44</b>	0.10	ug/l	H&P 8260 SV

### Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory (Certification # L11-175) in accordance with the DoD-ELAP program. H&P is approved by the State of Arizona under Certification Numbers AZM758 and AZ0779. H&P is approved as an Environmental Laboratory in conformance with the Environmental Laboratory Accreditation Program (CA) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste for the following methods:

Certificate# 2741, 2743, 2579, 2754 & 2740 approved for EPA 8260 and LUFT GC/MS  
Certificate# 2742, 2745, & 2741 approved for LUFT  
Certificate# 2745 & 2742 approved for EPA 418.1

H&P Mobile Geochemistry, Inc. is approved as an Environmental Laboratory in conformance with the National Environmental Accreditation Conference Standards for the category Environmental Analysis Air and Emissions for the following analytes and methods:

Hexachlorobutadiene by EPA TO-15 & TO-14A  
1,2,4-Trichlorobenzene by EPA TO-15 & TO-14A  
1,2-Dichlorobenzene by EPA TO-15 & TO-14A  
Dichlortetrafluoroethane by EPA TO-14A  
1,4-Dichlorobenzene by EPA TO-15 & TO-14A  
Benzene by EPA TO-15 & TO-14A  
Chlorobenzene by EPA TO-15 & TO-14A  
Ethyl benzene by EPA TO-15 & TO-14A  
Styrene by EPA TO-15 & TO-14A  
Toluene by EPA TO-15 & TO-14A  
Total Xylenes by EPA TO-15  
1,1,1-Trichloroethane by EPA TO-15 & TO-14A  
1,1,2,2-Tetrachloroethane by EPA TO-15 & TO-14A  
1,1,2-Trichloroethane by EPA TO-15 & TO-14A  
1,1-Dichloroethane by EPA TO-15 & TO-14A  
1,1-Dichloroethene by EPA TO-15 & TO-14A  
1,2-Dichloroethene by EPA TO-15 & TO-14A  
1,2-Dichloropropene by EPA TO-15 & TO-14A  
Benzyl Chloride by EPA TO-15 & TO-14A  
Bromoform by EPA TO-15  
Bromomethane by EPA TO-15 & TO-14A  
Carbon tetrachloride by EPA TO-15 & TO-14A  
Chloroethane by EPA TO-15 & TO-14A  
Chloroform by EPA TO-15 & TO-14A  
Chloromethane by EPA TO-15 & TO-14A  
cis-1,2-Dichloroethene by EPA TO-15 & TO-14A  
cis-1,3-Dichloropropene by EPA TO-15 & TO-14A  
Methylene chloride by EPA TO-15 & TO-14A  
Tetrachloroethane by EPA TO-15 & TO-14A  
trans-1,2-Dichloroethene by EPA TO-15  
trans-1,3-Dichloropropene by EPA TO-15 & TO-14A  
Trichloroethene by EPA TO-15 & TO-14A  
Vinyl chloride by EPA TO-15  
2-Butanone by EPA TO-15  
4-Methyl-2-Pentanone by EPA TO-15  
Hexane by EPA TO-15  
Methyl tert-butyl ether by EPA TO-15  
Vinyl acetate by EPA TO-15

This certification applies to samples analyzed in summa canisters.

Purge Volume Calculation		
Probe ID for PVT, if applicable:		
Tubing:	Length:	Diameter: 1 Volume:
Sand Pack (if included in purge volume calculation):	Height:	Diameter: 1 Volume:
Dry Bentonite (if included in purge volume calculation):	Height:	Diameter: 1 Volume:
PVT Increments:	1PV =	3PV = 10PV =
PV Amount Selected:	3PV	Selected by: jobsheet

Leak Check Information		
Leak Check Compound:	1,1-DFA	
Procedure:	Cloth saturated with LCC is placed around probe tubing at groundlevel.	
Other Notes:	* 50cc vapor collected unless otherwise specified.

**Re : 3317 Faring Capital  
A243698 / 4K03004**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 11/03/14 14:50 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

*Eydie Schwartz*

Eydie Schwartz  
Project Manager

March 8, 2017

Illoulian & Illulian Properties, LP  
8763 Melrose Avenue, Suite B538  
West Hollywood, California 90069

**Subject:** **PHASE I ENVIRONMENTAL SITE ASSESSMENT**  
1125 North Ogden Drive, West Hollywood, California 90046  
AEI Project No. 368901

Dear Jason Illoulian:

AEI Consultants is pleased to provide the Phase I Environmental Site Assessment (Phase I ESA) report of the above referenced address. This assessment was authorized and performed in accordance with the scope of services outlined in the proposal, the scope and limitations of ASTM Standard Practice E1527-13, and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we may assist you in any other matter, please contact me at (310) 798-4255 or [abennett@aeiconsultants.com](mailto:abennett@aeiconsultants.com).

Sincerely,

Adam Bennett  
AEI Consultants

## LIST OF COMMONLY USED ACRONYMS

AST	Aboveground Storage Tank
AUL	Activity and Use Limitation
APCD	Air Pollution Control District
AHERA	Asbestos Hazard Emergency Response Act
AQMD	Air Quality Management District
ACM	Asbestos-Containing Material
APN	Assessor's Parcel Number
bgs	Below Ground Surface
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
COC	Contaminant of Concern
CERCLA	Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System
CREC	Controlled Recognized Environmental Condition
EPA	Environmental Protection Agency
ESA	Environmental Site Assessment
HAZNET	Facility and Manifest Data
GPR	Ground-Penetrating Radar
HWS	Hazardous Waste Site
HVAC	Heating, Ventilation and Air Conditioning
HREC	Historical Recognized Environmental Condition
LLP	Landowner Liability Protection
LQG	Large Quantity Generator
LBP	Lead-Based Paint
LCP	Lead Containing Paint
LUST	Leaking Underground Storage Tank
MCL	Maximum Contaminant Level
MTBE	Methyl Tertiary Butyl Ether
µg/L	Micrograms per Liter
mg/kg	Milligrams per Kilogram
mg/L	Milligrams per Liter
NESHAP	National Emission Standards for Hazardous Air Pollutants
NPL	National Priorities List
NFA	No Further Action
ND	None Detected
NOV	Notice of Violation
NTC	Notice to Comply
O&M	Operations and Maintenance
OSHA	Occupational Safety and Health Administration
ppb	Parts per Billion
ppm	Parts per Million
PCE	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene, PERC
PTO	Permit to Operate
pCi/L	PicoCuries per Liter
PCB	Polychlorinated Biphenyl
REC	Recognized Environmental Condition
RCRA	Resource Conservation and Recovery Act
RP	Responsible Party
SDS	Safety Data Sheet
SEMS	Superfund Enterprise Management System
SVOC	Semi-Volatile Organic Compound
SQG	Small Quantity Generator
SLIC	Spills, Leaks, Investigation, and Cleanup
SEMS	Superfund Enterprise Management System
TPH	Total Petroleum Hydrocarbons

TCE	Trichloroethylene, Trichloroethene
UST	Underground Storage Tank
USDA	United States Department of Agriculture
USGS	United States Geological Survey
VOC	Volatile Organic Compound

## EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Illoulian & Illulian Properties, LP to conduct a Phase I ESA in conformance with the proposal and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1125 North Ogden Drive, West Hollywood, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

### PROPERTY DESCRIPTION

PROPERTY INFORMATION	
<b>Property Name</b>	N/A
<b>Street Address(es)</b>	1125 North Ogden Drive
<b>City</b>	West Hollywood
<b>State</b>	California
<b>Location</b>	West side of North Ogden Drive
<b>Vicinity Characteristics</b>	Commercial and residential mixed use
<b>Approximate Site Acreage/Source</b>	0.17/Site Contact
<b>Property Type</b>	Multi-family
<b>Subject Property Use(s)</b>	Residential
<b>Assessor Parcel Number(s)</b>	5530-002-027
SITE AND BUILDING INFORMATION	
<b>Number of Buildings</b>	One
<b>Year(s) of Construction</b>	1949
<b>Number of Floors/Stories</b>	Two
<b>Basement or Subgrade Area(s)</b>	Crawl space
<b>Number of Units</b>	Seven
<b>Building Area (SF)/Source</b>	3,718/Site Contact
<b>Building Description(s)</b>	One two-story residential building with crawl-space foundation
<b>Building Occupant(s)</b>	Multiple residential tenants
<b>Additional Improvements</b>	Concrete sidewalks, asphalt covered parking area and associated landscaping
<b>Current On-site Operations</b>	Residential and maintenance activities
<b>Current Use of Hazardous Substances</b>	None identified
UTILITY PROVIDER INFORMATION	
<b>Natural Gas Provider</b>	The Gas Company
<b>Electricity Provider</b>	Southern California Edison
<b>Heating System Fuel Source</b>	Natural gas
<b>Cooling System Power Source</b>	Electricity
<b>Potable Water Provider or Source</b>	Los Angeles Department of Water and Power
<b>Sewage Disposal Provider or Treatment System</b>	Los Angeles County Sanitation District
REGULATORY INFORMATION	
<b>Regulatory Database Listings</b>	FTTS INSP, FRS; refer to Section 5.1
<b>Institutional Controls</b>	None identified
<b>Engineering Controls</b>	None identified

<b>Environmental Liens</b>	None identified
----------------------------	-----------------

Based on a review of historical sources, the subject property was identified to consist of vacant land in at least 1919. Construction of the current site improvements began in 1948/1949 and has been occupied by residential tenants since that time.

The following historical address was associated with the subject property: 1127 North Ogden Drive. This address was also researched as part of this assessment.

The immediately surrounding properties consist of the following:

<b>Direction from Site</b>	<b>Tenant/Use (Address)</b>	<b>Regulatory Database Listing(s)</b>
<b>North</b>	Multi-tenant / residential (1133 North Ogden Drive)	None identified
<b>Northeast</b>	North Ogden Drive followed by: Multi-tenant / residential (1128-1134 North Ogden Drive)	None identified
<b>East</b>	North Ogden Drive followed by: Multi-tenant / residential (1118 - 1126 North Ogden Drive)	None identified
<b>South</b>	Multi-tenant / residential (1119-1123 North Ogden Drive)	None identified
<b>West</b>	Public Parking Lot (1114 North Orange Grove Avenue)	None identified
<b>Northwest</b>	Multi-tenant / residential (1128 North Orange Grove Avenue)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

Based upon the Soil and Groundwater Assessment and Site Closure Report (SGASCR) for the Vacant lot located at 801 North Fairfax Avenue (approximately 0.43 mile south-southwest of the subject property) obtained from the Regional Water Quality Control Board, the direction of groundwater flow beneath the subject property is inferred to be to the west-southwest. Based on SGASCR , groundwater is presumed to be present at an estimated depth of 42 to 43 feet bgs.

## FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Based on a review of historical records, the adjacent site to the west was formerly a neon sign manufacturing company with a spray painting booth from at least 1950 until at least 1970. This site was not listed in the regulatory database. The paint booth operated at a time that pre-dates regulatory oversight of hazardous materials and petroleum products. However, spray painting operations typically use chlorinated solvents, particularly PCE, during surface preparation and spray gun cleaning activities. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with on-site operations. Based on the proximity of this site to the subject property, the potential exists that, if a release of chlorinated solvents occurred at this site, the subsurface of the subject property may have also been impacted. Assessment of the subject property does not indicate that the subject property would be investigated as a source of this contamination, and therefore, it is unlikely that the subject property owner would be responsible for any cleanup costs associated with a release at this site. The User should be aware that if groundbreaking activities or redevelopment of the subject property occurs, residual impacts from this adjacent site may be present. However, no releases have been reported from this site. Based on the lack of a documented release and time elapsed since last use, the adjacent site is not expected to represent a REC to the subject property at this time.
- According to Mr. Darren Embry, demolition of the building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.
- Due to the age of the subject property building, there is a potential that LBP is present. During the site inspection, damaged and peeling paint was observed throughout the interior and exterior of the subject property building. AEI understands that demolition

activities of the subject property building is planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS**

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 1125 North Ogden Drive, West Hollywood, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

# **1.0 INTRODUCTION**

---

This report documents the methods and findings of the Phase I ESA performed in conformance with the proposal and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1125 North Ogden Drive, West Hollywood, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

## **1.1 SCOPE OF WORK**

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

## **1.2 ADDITIONAL SERVICES**

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

## **1.3 SIGNIFICANT ASSUMPTIONS**

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

## **1.4 LIMITATIONS**

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

## **1.5 LIMITING CONDITIONS/DEVIATIONS**

The performance of this Phase I ESA was limited by the following:

- Due to the size of the property, a representative sample of interior spaces was inspected by AEI. Due to the residential nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment. AEI inspected the following units: 1125-1, 1125-2, 1125 3/4 and 1127.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall Findings of this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

## **1.6 DATA GAPS AND DATA FAILURE**

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

### **1.6.1 DATA FAILURE**

The following data failure was identified during the course of this assessment:

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use . AEI was not able to track the history of the subject property between the years 1920 and 1947 as none of the historical sources utilized as part of this assessment covered this time period. In the 1919 Sanborn Map, the subject property appears as vacant undeveloped land. In the 1949 building permit the subject property is developed with the current multi-family residential structures. Thus, it is assumed that during the 1920 and 1947 time period the subject property would have been undeveloped, if not residential. Therefore, this data failure is not expected to significantly alter the Findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, interviews

### **1.6.2 DATA GAPS**

AEI did not identify significant data gaps which affected our ability to identify RECs.

### **1.7 RELIANCE**

All reports, both verbal and written, are for the benefit of Illoulian & Illulian Properties, LP. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's proposal and Standard Terms and Conditions executed by Illoulian & Illulian Properties, LP on February 21, 2017. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

## **2.0 SITE AND VICINITY DESCRIPTION**

---

### **2.1 SITE LOCATION AND DESCRIPTION**

<b>PROPERTY INFORMATION</b>	
<b>Property Name</b>	N/A
<b>Street Address(es)</b>	1125 North Ogden Drive
<b>City</b>	West Hollywood
<b>State</b>	California
<b>Location</b>	West side of North Ogden Drive
<b>Vicinity Characteristics</b>	Commercial and residential mixed use
<b>Approximate Site Acreage/Source</b>	0.17/Site Contact
<b>Property Type</b>	Multi-family
<b>Subject Property Use(s)</b>	Residential
<b>Assessor Parcel Number(s)</b>	5530-002-027
<b>SITE AND BUILDING INFORMATION</b>	
<b>Number of Buildings</b>	One
<b>Year(s) of Construction</b>	1949
<b>Number of Floors/Stories</b>	Two
<b>Basement or Subgrade Area(s)</b>	Crawl space
<b>Number of Units</b>	Seven
<b>Building Area (SF)/Source</b>	3,718/Site Contact
<b>Building Description(s)</b>	One two-story residential building with crawl-space foundation
<b>Building Occupant(s)</b>	Multiple residential tenants
<b>Additional Improvements</b>	Concrete sidewalks, asphalt covered parking area and associated landscaping
<b>Current On-site Operations</b>	Residential and maintenance activities
<b>Current Use of Hazardous Substances</b>	None identified
<b>UTILITY PROVIDER INFORMATION</b>	
<b>Natural Gas Provider</b>	The Gas Company
<b>Electricity Provider</b>	Southern California Edison
<b>Heating System Fuel Source</b>	Natural gas
<b>Cooling System Power Source</b>	Electricity
<b>Potable Water Provider or Source</b>	Los Angeles Department of Water and Power
<b>Sewage Disposal Provider or Treatment System</b>	Los Angeles County Sanitation District
<b>REGULATORY INFORMATION</b>	
<b>Regulatory Database Listings</b>	FTTS INSP, FRS; refer to Section 5.1
<b>Institutional Controls</b>	None identified
<b>Engineering Controls</b>	None identified
<b>Environmental Liens</b>	None identified

Utility provider information listed in the table above is provided by Mr. Darren Embry, Director of Community Development, unless otherwise noted above.

## **2.2 SITE AND VICINITY CHARACTERISTICS**

The immediately surrounding properties consist of the following:

<b>Direction from Site</b>	<b>Tenant/Use (Address)</b>	<b>Regulatory Database Listing(s)</b>
<b>North</b>	Multi-tenant / residential (1133 North Ogden Drive)	None identified
<b>Northeast</b>	North Ogden Drive followed by: Multi-tenant / residential (1128-1134 North Ogden Drive)	None identified
<b>East</b>	North Ogden Drive followed by: Multi-tenant / residential (1118 - 1126 North Ogden Drive)	None identified
<b>South</b>	Multi-tenant / residential (1119-1123 North Ogden Drive)	None identified
<b>West</b>	Public Parking Lot (1114 North Orange Grove Avenue)	None identified
<b>Northwest</b>	Multi-tenant / residential (1128 North Orange Grove Avenue)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

## **2.3 PHYSICAL SETTING**

**Geology:** According to the United States Department of Agriculture's Report and General Soil Map for Los Angeles County, the area surrounding the subject property is underlain by soils of the Hanford association. Hanford soils consist of well-drained soils on flood plains and alluvial fans. In a typical profile the surface layer is light brownish gray fine sandy loam seven inches thick. The material to a depth of 60 inches or more is yellowish-brown coarse sandy loam and gravelly coarse sand substratum.

<b>USGS Topographic Map:</b>	Hollywood, California Quadrangle
<b>Nearest surface water to subject property:</b>	Franklin Canyon Reservoir / 2.93 mile west
<b>Gradient Direction/Source:</b>	West-southwest / Soil and Groundwater Assessment and Site Closure Report (SGASCR) for the Vacant lot located at 801 North Fairfax Avenue (approximately 0.43 mile south-southwest of the subject property) obtained from the Regional Water Quality Control Board
<b>Estimated Depth to Groundwater/Source:</b>	42 to 43 feet bgs / SGASCR

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

## **3.0 HISTORICAL REVIEW OF SITE AND VICINITY**

---

### **3.1 HISTORICAL SUMMARY**

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

<b>Date Range</b>	<b>Subject Property Description/Use</b>	<b>Source(s)</b>
1919	Vacant lot	Sanborn maps
1920 - 1947	Unknown	Data failure; refer to Section 1.6.1
1948/1949 - present	Current multi-tenant residential structure	Aerial photographs, Building permits, City directories, Interviews, Sanborn maps, Site observation

Based on a review of historical sources, the subject property was identified to consist of vacant land in at least 1919. Construction of the current site improvements began in 1948/1949 and has been occupied by residential tenants since that time.

The following historical address was associated with the subject property: 1127 North Ogden Drive. This address was also researched as part of this assessment.

AEI did not identify potential environmental concerns in association with the current or historical use of the subject property.

### **3.2 AERIAL PHOTOGRAPHS**

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the Envirosite Corporation collection of aerial photographs. Aerial photographs were reviewed for the following years:

<b>Year(s)</b>	<b>Subject Property Description</b>	<b>Adjacent Site Descriptions</b>
1948	The subject property appears developed with the a residential structure or under development with the current structure	NORTH: Residential structures NORTHEAST: Roadway followed by: residential structures EAST: Roadway followed by: residential structures SOUTH: Residential structures WEST: Commercial structures NORTHWEST: Residential structure

<b>Year(s)</b>	<b>Subject Property Description</b>	<b>Adjacent Site Descriptions</b>
1952	The subject property appears developed with the current residential structure	NORTH: No significant change is noted  NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: No significant change is noted  NORTHWEST: No significant change is noted
1964, 1972, 1977, 1980, 1985, 1989, 1994	No significant change is noted	NORTH: Current multi-family residential dwelling  NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: No significant change is noted  NORTHWEST: Commercial structure
2002	Unidentifiable	NORTH: Unidentifiable  NORTHEAST: Unidentifiable EAST: Unidentifiable SOUTH: Unidentifiable WEST: Unidentifiable  NORTHWEST: Unidentifiable
2005. 2010, 2014	The subject property appears with the current site improvements	NORTH: Current multi-family residential structure  NORTHEAST: Roadway followed by: current residential structures EAST: Roadway followed by: current residential structures SOUTH: Current residential structures WEST: Current parking lot  NORTHWEST: Current commercial day school

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

If available, copies of historical aerial photographs are provided in the report appendices.

### **3.3 SANBORN FIRE INSURANCE MAPS**

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the Historic Information Gatherers collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

<b>Year(s)</b>	<b>Subject Property Description (Listed Address)</b>	<b>Adjacent Site Descriptions</b>
1919	Vacant lot located on Friend Avenue	NORTH: Vacant lot NORTHEAST: Friend Avenue followed by: vacant lots EAST: Friend Avenue followed by: vacant lots SOUTH: Vacant lot WEST: Vacant lot  NORTHWEST: Residential dwelling
1950, 1955	Current multi-tenant / residential structure addressed as 1125 - 1127 North Ogden Drive	NORTH: Residential dwelling  NORTHEAST: North Ogden Drive followed by: Multi-family residential structures with associated automotive structure EAST: North Ogden Drive followed by: Multi-family residential structures SOUTH: Multi-family residential structures WEST: A store, office and neon sign manufacturing with spray painting  NORTHWEST: No significant change is noted
1962, 1966, 1970	No significant change is noted	NORTH: Multi-tenant residential  NORTHEAST: No significant change is noted EAST: No significant change is noted SOUTH: No significant change is noted WEST: No significant change is noted  NORTHWEST: Nursery School

Based on a review of historical records, the adjacent site to the west was formerly a neon sign manufacturing company with a spray painting booth from at least 1950 until at least 1970. This site was not listed in the regulatory database. The paint booth operated at a time that pre-dates regulatory oversight of hazardous materials and petroleum products. However, spray painting operations typically use chlorinated solvents, particularly PCE, during surface preparation and spray gun cleaning activities. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with on-site operations. Based on the proximity of this site to the subject property, the potential exists that, if a release of chlorinated solvents occurred at this site, the subsurface of the subject property may have also been impacted. Assessment of the subject property does not indicate that the subject property would be investigated as a source of this contamination, and therefore, it is unlikely that the subject property owner would be responsible for any cleanup costs associated with a release at this site. The User should be aware that if groundbreaking activities or redevelopment of the subject property occurs, residual impacts from this adjacent site may be present. However, no releases have been reported from this site. Based on the lack of a documented release and time elapsed since last use, the adjacent site is not expected to represent a REC to the subject property at this time.

If available, copies of historical Sanborn maps are provided in the report appendices.

### **3.4 CITY DIRECTORIES**

A search of historical city directories was conducted for the subject property utilizing Envirosite Corporation. The following table summarizes the results of the city directory search.

<b>Year(s)</b>	<b>Address - Occupant Listed</b>
1875, 1881, 1886, 1891, 1896, 1899, 1905, 1910, 1915, 1920, 1925, 1930, 1935, 1941, 1946	No listing
1951	1127 North Ogden Drive - Residence
1956, 1963, 1968, 1970, 1975	1125 North Ogden Drive - Apartment 1127 North Ogden Drive - Residence
1981, 1985	1125 North Ogden Drive - Apartment
1990, 1995	1125 North Ogden Drive - Apartment 1127 North Ogden Drive - Residence
1998, 2001, 2006	1125 North Ogden Drive - Residence
2010	No listing
2015	1125 North Ogden Drive - Residence

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

If available, copies of historical city directories are provided in the report appendices.

### **3.5 HISTORICAL TOPOGRAPHIC MAPS**

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

### **3.6 CHAIN OF TITLE**

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

## **4.0 REGULATORY AGENCY RECORDS REVIEW**

---

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

### **4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY**

On February 22, 2017, AEI contacted the Los Angeles County Public Health Investigations via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

No information on the subject property was on file with the LACPHI.

### **4.2 FIRE DEPARTMENT**

The City of West Hollywood is serviced by the Los Angeles County Fire Department. The Los Angeles County Fire Department Health Hazardous Materials Division has centralized the storage of files regarding hazardous material usage, storage and historical information with LACPHI. Refer to Section 4.1.1.

### **4.3 BUILDING DEPARTMENT**

On February 22, 2017, AEI contacted the West Hollywood Building Department via email for information on the subject property in order to identify historical tenants, features of concern and property use.

Please refer to the following table for a listing of permits reviewed:

<b>Year(s)</b>	<b>Owner/Applicant</b>	<b>Description of Permit and Building Use</b>
1949	Mr & Mrs Arthur Davids	Building permit / new apartments 7 units
1998	HaverJ & Ankine Mouradian	Building permit / balcony floor repair due to termite damage
2003	Mouradian	Plumbing permit / additional gas lines and repair/ alteration of drainage and/or vent piping
2004	Ankine Mouradian	Building permit / replace window
2006	Ankine Tr Ankine Mouradian	Building permit / reroof
2009	Ankine Tr Ankine Mouradian	Building permit / replace stairway handrail on outside of building
2011	Ankine Tr Ankine Mouradian	Mechanical permit / Furnace, ac compressor
2012	Ankine Tr Ankine Mouradian	Mechanical permit / Furnace, ac compressor

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the West Hollywood Building Department.

#### **4.4 PLANNING DEPARTMENT**

On February 22, 2017, AEI contacted the West Hollywood Planning Department via email for information on the subject property in order to identify AULs associated with the subject property.

AEI spoke with Rocio Martinez, Records Management Specialist, who indicated that evidence indicating the existence of AULs was not on file for the subject property with the West Hollywood Planning Department.

#### **4.5 COUNTY ASSESSOR OFFICE**

On February 22, 2017, AEI visited the Los Angeles County assessor's office website for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Los Angeles County assessor's office, the current building was constructed in 1949.

#### **4.6 OIL AND GAS WELLS/PIPELINES**

On February 22, 2017, AEI reviewed the California Department of Conservation Division of Oil, Gas and Geothermal Resources (DOGGR) maps and the National Pipeline Mapping System (NPMS) Public Map Viewer concerning the subject property and nearby properties. The maps contain information regarding oil and gas development.

According to the California Department of Conservation Division of Oil, Gas and Geothermal Resources map, oil or gas wells are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

According to the NPMS Public Map Viewer, pipelines are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

#### **4.7 OTHER AGENCIES SEARCHED**

**South Coast Air Quality Management District (SCAQMD)** On February 22, 2017, AEI visited the SCAQMD website for information regarding any records of Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) issued to occupants of the subject property and associated with air emission equipment primarily related to stationary sources of air pollution, such as dry cleaning machines, boilers, and/or underground storage tanks.

No information on the subject property was on file with the SCAQMD.

**The Regional Water Quality Control Board (RWQCB)** On February 22, 2017, AEI visited the GeoTracker website for information on the subject property and nearby sites of concern to identify any evidence of unauthorized releases of hazardous materials to the groundwater. Cases typically handled by the RWQCB include releases from underground storage tanks (USTs).

No information on the subject property was on file with the RWQCB-GeoTracker website.

**Department of Toxic Substances Control (DTSC)** On February 22, 2017, AEI visited the online Waste Tracking System (HWTS) database maintained by the DTSC for information regarding documented hazardous wastes generated at the subject property.

No information on the subject property was on file with the DTSC-HWTS website.

**The United States Fish and Wildlife Service (USFWS)** On February 22, 2017, AEI visited the USFWS national wetlands inventory website for information wetlands locations at or in the vicinity of the subject property.

No information about wetlands located at or in the vicinity of the subject property was on file with the USFWS.

**The California Department of Toxic Substances Control (CDTSC)** On February 22, 2017, AEI visited the EnviroStor website for information on the subject property and nearby sites of concern to identify any evidence of unauthorized releases of hazardous materials to the groundwater. Cases typically handled by the CDTSC include hazardous waste facilities and cleanup.

No information on the subject property was on file with the CDTSC-EnviroStor website.

**The Los Angeles County Department of Public Works (LACDPW)** On February 22, 2017, AEI visited the LACDPW website for information on the subject property in order to identify underground storage tanks (USTs) and/or previous or current hazardous material usage.

No information on the subject property was on file with the LACDPW website.

#### **4.8 STATE ENVIRONMENTAL SUPERLIENS AND PROPERTY TRANSFER LAWS**

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens and/or property transfer laws.

## **5.0 REGULATORY DATABASE RECORDS REVIEW**

---

AEI contracted Envirosite Corporation (EC) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EC into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EC, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix C of this report.

The subject property was identified in the regulatory database report as follows: FTTS INSP, FRS. See Section 5.1 for additional discussion.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

### **5.1 RECORDS SUMMARY**

<b>Database</b>	<b>Search Distance (Miles)</b>	<b>Subject Property Listed</b>	<b>Number of Listings within Search Distance</b>	<b>Recognized Environmental Condition or Other Environmental Consideration (Yes or No)</b>
NPL	1	No	0	
DELISTED NPL	0.5	No	0	
SEMS (formerly CERCLIS)	0.5	No	0	
SEMS-ARCHIVE (formerly CERCLIS NFRAP)	0.5	No	0	
RCRA CORRACTS	1	No	0	
RCRA-TSDF	0.5	No	0	
RCRA LQG, SQG, CESQGs, VGN, NLR	SP/ADJ	No	0	
US ENG CONTROLS	SP	No	0	
US INST CONTROLS	SP	No	0	
ERNS	SP	No	0	
STATE/TRIBAL HWS	1	No	6	No; sites within the search radius are cross gradient and/or at sufficient distance and are not expected to represent a significant environmental concern

<b>Database</b>	<b>Search Distance (Miles)</b>	<b>Subject Property Listed</b>	<b>Number of Listings within Search Distance</b>	<b>Recognized Environmental Condition or Other Environmental Consideration (Yes or No)</b>
STATE/TRIBAL SWLF	0.5	No	0	
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	No	0	
STATE/TRIBAL LUST	0.5	No	9	No; sites within the search radius are cross gradient and/or at sufficient distance and are not expected to represent a significant environmental concern
STATE/TRIBAL EC and IC	SP	No	0	
STATE/TRIBAL VCP	0.5	No	0	
STATE/TRIBAL BROWNFIELD	0.5	No	0	
ORPHAN	N/A	No	30	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	<b>Yes</b>	2	No; subject property listings are discussed below

Facility Name: Hazard Control DBA Environmental Res Cal
Database(s): FTTS INSP, FRS
Address: 1125 North Ogden Drive
Distance: Subject property
Direction: Subject property
Comments: The subject property is listed in the FTTS INSP database. This database lists tracking of inspections related to the Federal Insecticide, Fungicide and Rodenticide Act and Toxic Substance Control Act (FIFRA/TSCA). The inspection was dated May 26, 2004. No further information was available in this database.
The subject property is listed in the FRS database. Facility Registration System database lists the subject property with ID number 110022537370 identified in the NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements. No further information was available in this database.
Based on the lack of documented release and the nature of the listings, these listings are not expected to represent a significant environmental concern.

## 5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation,

to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

## **6.0 INTERVIEWS AND USER PROVIDED INFORMATION**

---

### **6.1 INTERVIEWS**

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

#### **6.1.1 INTERVIEW WITH OWNER**

AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall Findings of this assessment.

#### **6.1.2 INTERVIEW WITH KEY SITE MANAGER**

The key site manager, Darren Embry, was contacted via email on March 1st and March 7th, 2017. As of the date of this report Darren Embry has not responded to AEI's request for interview. Mr. Embry sent AEI a preliminary questionnaire that indicated that the subject property is slated for demolition.

#### **6.1.3 PAST OWNERS, OPERATORS, AND OCCUPANTS**

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

#### **6.1.4 INTERVIEW WITH OTHERS**

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

### **6.2 USER PROVIDED INFORMATION**

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Darren Embry, Director of Community Development. Sections 6.2.1 through 6.2.6 represent information contained therein.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

### **6.2.1 ENVIRONMENTAL LIENS**

AEI was not informed by Mr. Darren Embry of any environmental cleanup liens encumbering the subject property that are filed or recorded under federal, tribal, state, or local law.

### **6.2.2 ACTIVITY AND LAND USE LIMITATIONS**

AEI was not informed by Mr. Darren Embry of any AULs, such as engineering controls, land use restrictions, or institutional controls, that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law.

### **6.2.3 SPECIALIZED KNOWLEDGE**

AEI was not informed by Mr. Darren Embry of any specialized knowledge or experience related to the subject property or nearby properties.

### **6.2.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES**

Mr. Darren Embry did not indicate to AEI any information to suggest that the valuation of the subject property is significantly less than the valuation for comparable properties due to environmental factors.

### **6.2.5 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION**

Mr. Darren Embry did not inform AEI of any commonly known or reasonably ascertainable information about the subject property which aided AEI in identifying conditions indicative of a release or threatened release.

### **6.2.6 KNOWLEDGE OF PRESENCE OR LIKELY PRESENCE OF CONTAMINATION**

Mr. Darren Embry did not inform AEI of any obvious indicators that pointed to the presence or likely presence of contamination at the subject property.

## **6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION**

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

## 7.0 SITE RECONNAISSANCE

<b>Site Reconnaissance Date</b>	March 6, 2017
<b>AEI Site Assessor(s)</b>	Jeff McNeil
<b>Property Escort(s)/Relationship(s) to Property</b>	Kyle Jones / real estate agent
<b>Units/Areas Observed</b>	Due to the size of the property, a representative sample of interior spaces was inspected by AEI. Due to the residential nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment. AEI inspected the following units: 1125-1, 1125-2, 1125 3/4 and 1127
<b>Area(s) not accessed and reason(s)</b>	Units not specified above
<b>Weather</b>	Clear and sunny

### 7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

<b>Yes</b>	<b>No</b>	<b>Observation</b>
	✓	Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✓	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✓	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✓	Unidentified Substance Containers
	✓	Electrical or Mechanical Equipment Likely to Contain Fluids
	✓	Interior Stains or Corrosion
	✓	Strong, Pungent, or Noxious Odors
	✓	Pools of Liquid
✓		Drains, Sumps, and Clarifiers
	✓	Pits, Ponds, and Lagoons
✓		Stained Soil or Pavement
	✓	Stressed Vegetation
	✓	Solid Waste Disposal or Evidence of Fill Materials
	✓	Waste Water Discharges
	✓	Wells
	✓	Septic Systems
	✓	Biomedical Wastes
✓		Other

The subject property is currently occupied by multiple residential tenants. On-site operations consist of residential and maintenance activities.

## **DRAINS, SUMPS, AND CLARIFIERS**

One storm drain was observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drain. Based on the use of the drain solely for storm water runoff, the presence of the drain is not expected to represent a significant environmental concern.

## **STAINED SOIL AND PAVEMENT**

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

## **OTHER**

The subject property is currently occupied by residential tenants. Small amounts of cleaning supplies, maintenance supplies, paints and roof patching compounds were observed on site. All materials were packaged in consumer quantities and no signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

## **7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS**

<b>Yes</b>	<b>No</b>	<b>Observation</b>
	✓	Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✓	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✓	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✓	Unidentified Substance Containers
✓		Electrical or Mechanical Equipment Likely to Contain Fluids
	✓	Strong, Pungent, or Noxious Odors
	✓	Pools of Liquid
	✓	Drains, Sumps, and Clarifiers
	✓	Pits, Ponds, and Lagoons
	✓	Stained Soil or Pavement
	✓	Stressed Vegetation
	✓	Solid Waste Disposal or Evidence of Fill Materials
	✓	Waste Water Discharges
	✓	Wells
	✓	Septic Systems
	✓	Other

## **ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS**

### *Transformers*

Four pole-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers.

Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

## **8.0 OTHER ENVIRONMENTAL CONSIDERATIONS**

---

### **8.1 ASBESTOS-CONTAINING BUILDING MATERIALS**

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific, and building products.

At the federal level, asbestos is primarily regulated by the United States EPA primarily through the EPA's NESHAP (Standard 40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard, and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state, or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

<b>Material Type</b>	<b>Location</b>
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls, Floors, and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape, and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

All observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance.

According to Mr. Darren Embry, demolition of the building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

## **8.2 LEAD-BASED PAINT**

LBP is defined as any paint, varnish, stain, or other applied coating that has  $\geq 1 \text{ mg/cm}^2$  (5,000  $\mu\text{g/g}$  or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from  $0.5 \text{ mg/cm}^2$  to  $2.0 \text{ mg/cm}^2$ . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LCP is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LCP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. During the site inspection, damaged and peeling paint was observed throughout the interior and exterior of the subject property building. AEI understands that demolition activities of the subject property building is planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and

worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

### **8.3 RADON**

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

### **8.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER**

The Los Angeles Department of Water and Power supplies potable water to the subject property. The most recent water quality report (2015) states that the 90th percentile value for lead levels in samples obtained from the area's water supply was 6.3 µg/L. Typical sources of lead in drinking water include corrosion of household plumbing systems. Overall, lead levels are well within standards established by the United States EPA.

### **8.5 MOLD/INDOOR AIR QUALITY ISSUES**

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property building in order to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems, and behind enclosed walls and ceilings, may be present on the subject property.

## **9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
