4. NEW BUSINESS:
A. Crosswalk Markings at the Intersections on Santa Monica Blvd That Have Colored Stamped Asphalt

The Commission asked if there was any statistical need for replacing the crosswalks.

Richard Garland replied that the crosswalks were being replaced as a matter of maintenance.

The Commission was conflicted on the look of the crosswalks.

The Commission expressed concerns about meeting standards.

Bob Cheung explained that state standards would be met.

The Commission asked if one type of crosswalk was more effective than the other.

Richard Garland explained that there has been no comparison, but national research shows that continental crosswalks reduce incidents.

The Commission showed interest in adding more rainbow crosswalks, but wanted more information in order to decide.

ACTION: Support the Public Works Department's recommendation to replace the existing worn and faded colored stamped asphalt crosswalks on Santa Monica Boulevard with State of California/Caltrans standardized high-visibility continental crosswalk markings that are already in use at all other intersections on Santa Monica Boulevard, except at Santa Monica Boulevard/San Vicente Boulevard until staff returns with more data on the effectiveness of the rainbow crosswalks.

Motion by Eichman seconded by Stienkruger
